

DCX Vision and Ambition in the Ampère context From Car Plan to Inspiring Mobility

21/10/22

Summary

01

On track for Revolution phase

02

Which experience to emerge profitably and permanently in mobility?

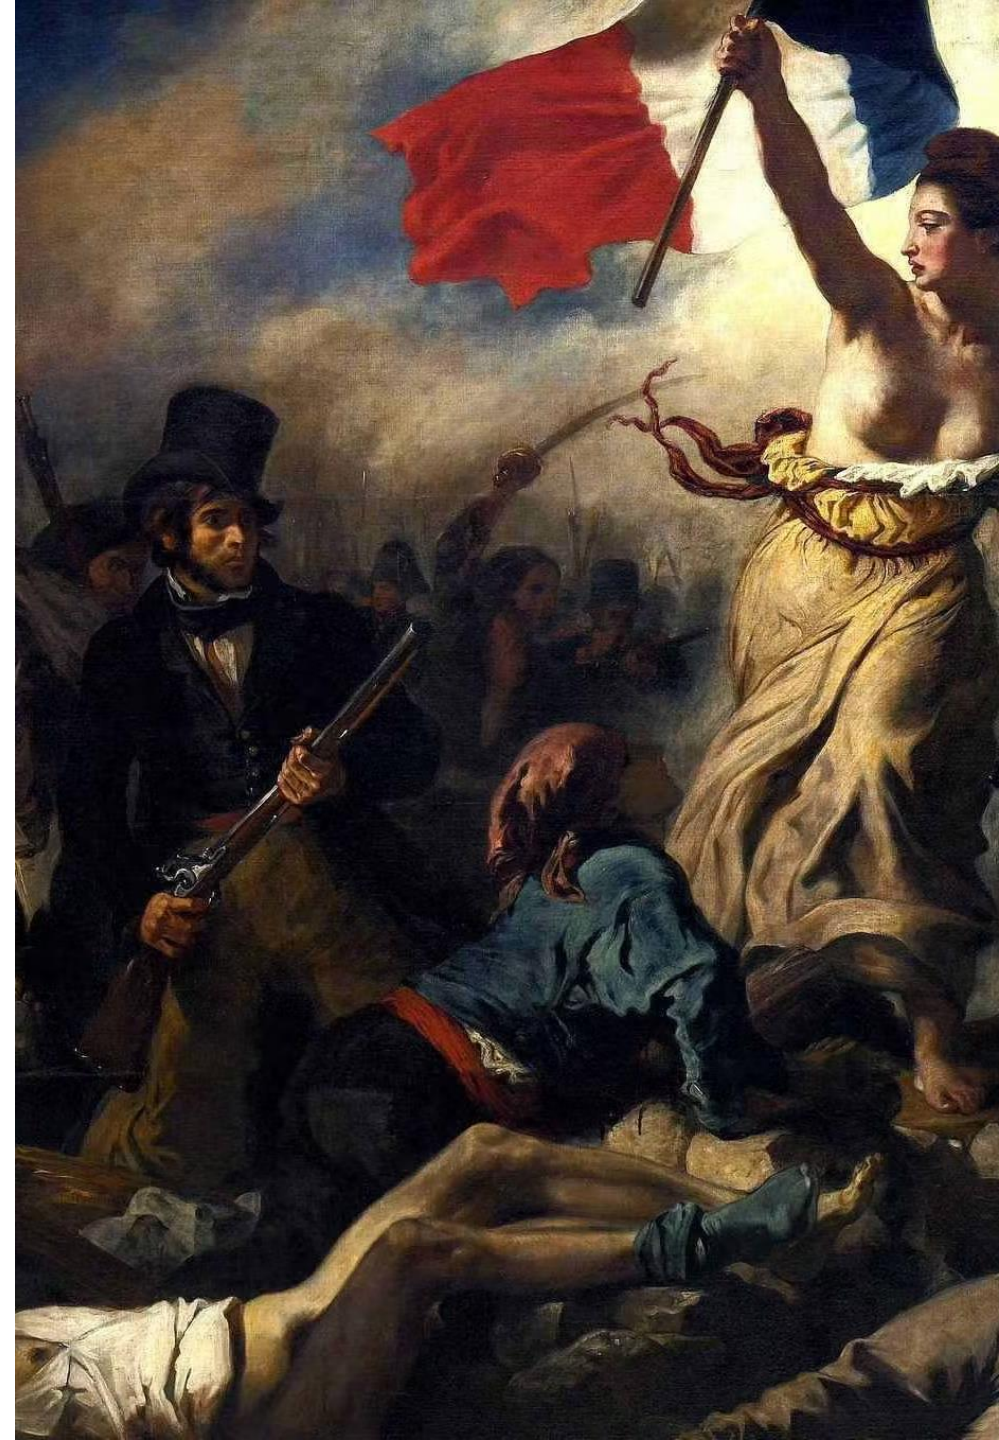

03

How to build Inspiring Mobility for Ampère Experience?

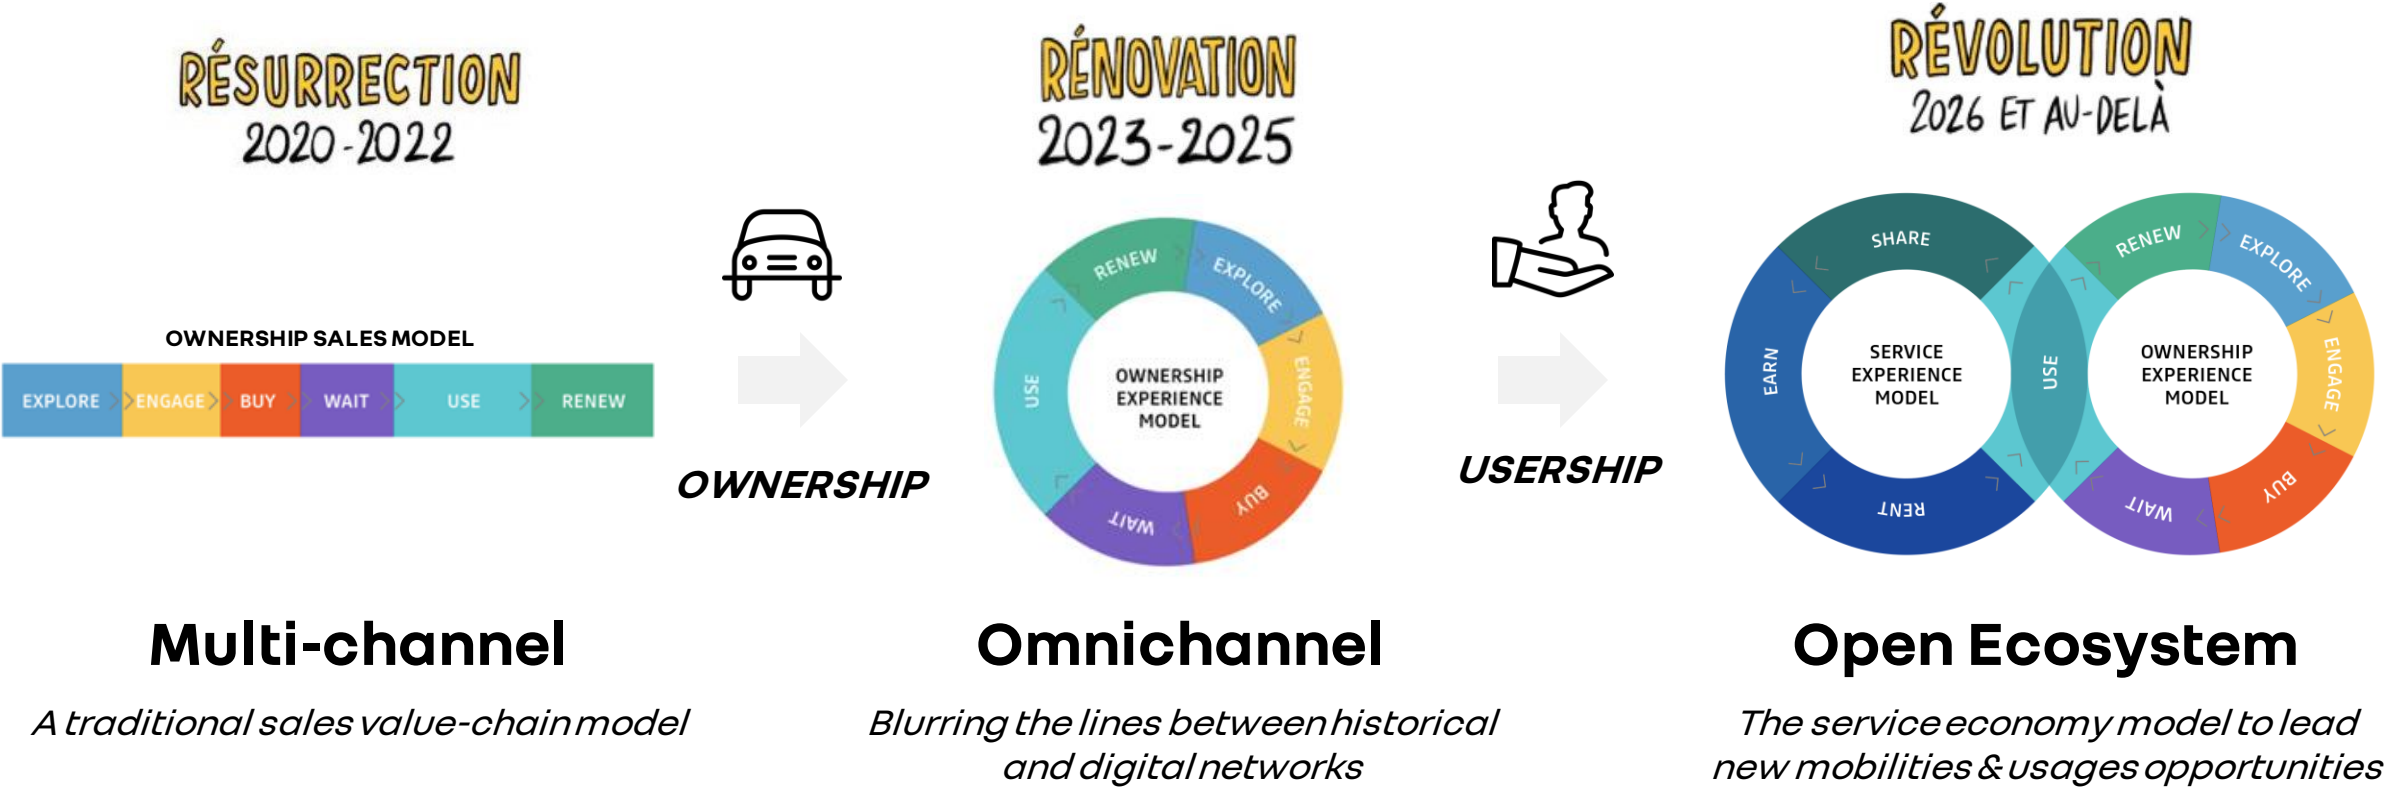

01

On track for Revolution

CONTEXT

Our goal: establish a paradigm shift from a multichannel model to an open ecosystem model

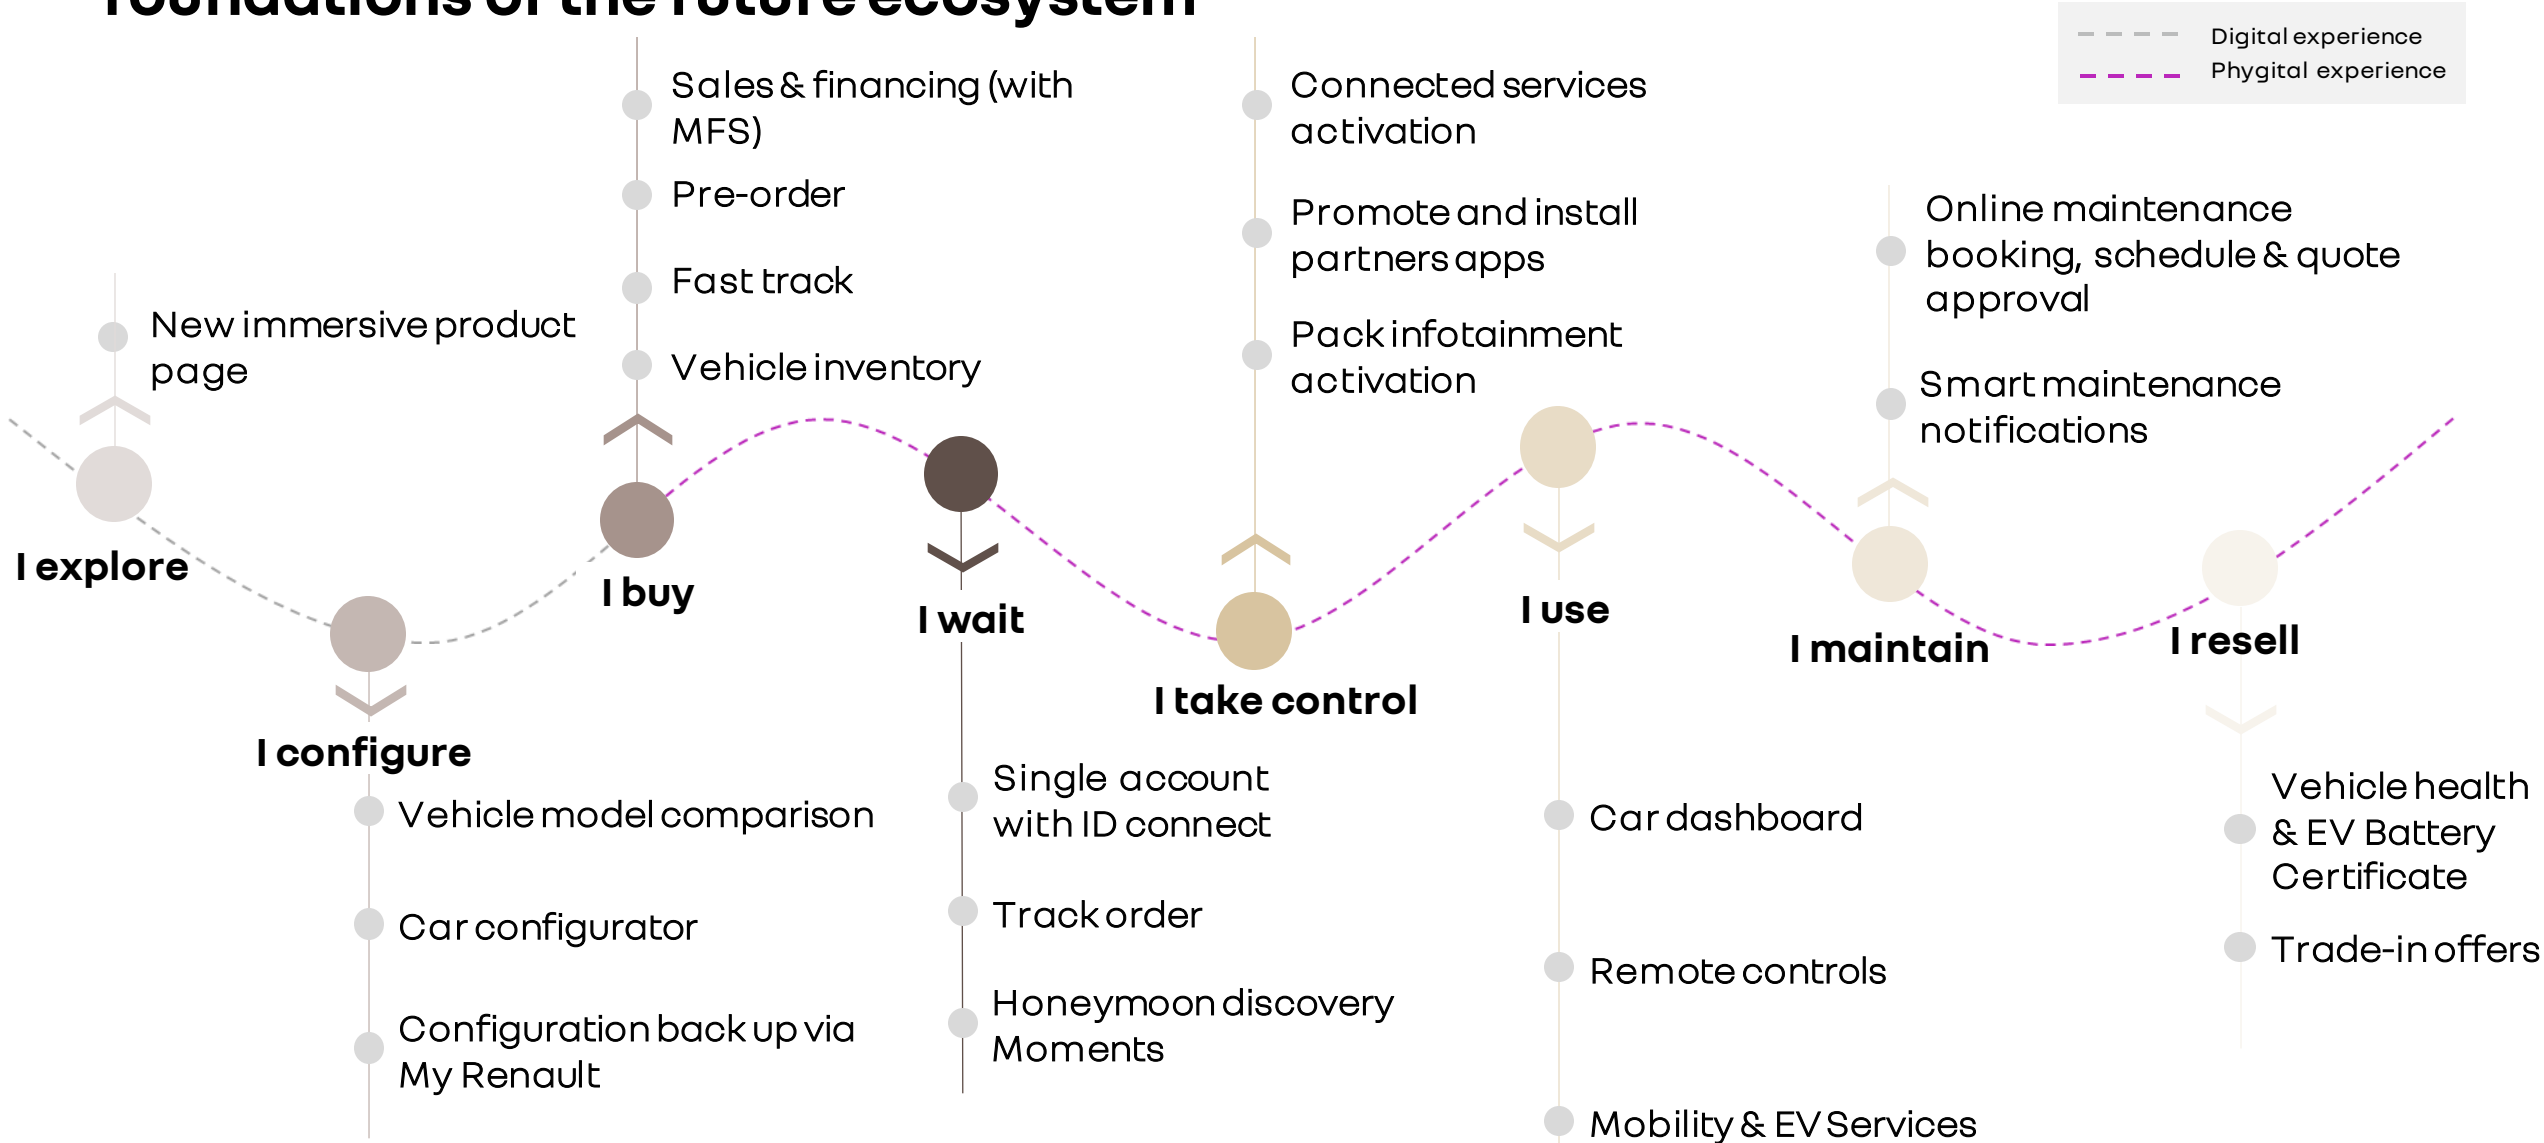

FROM RAW DATA...

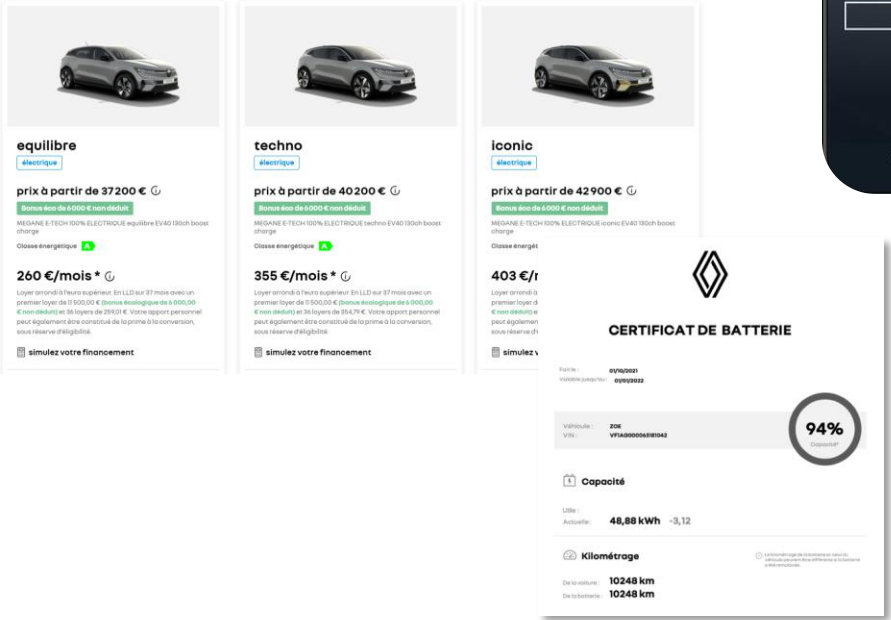

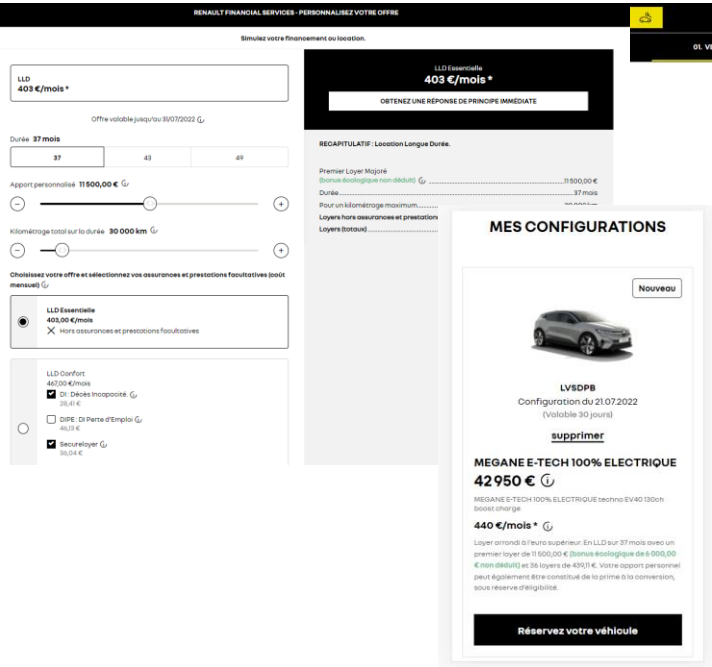

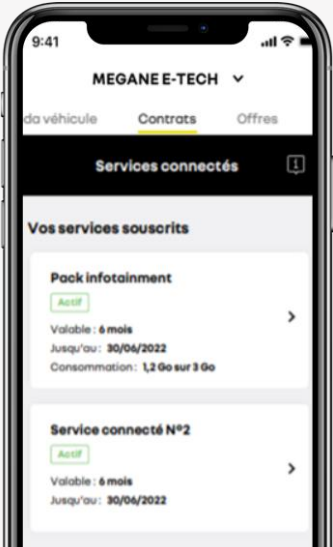

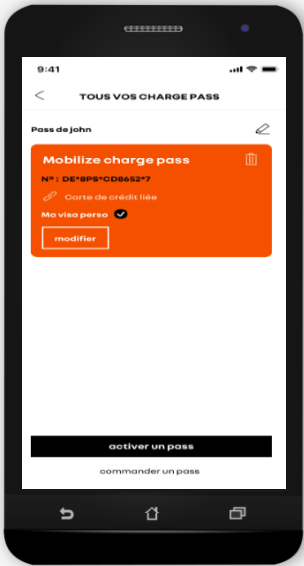

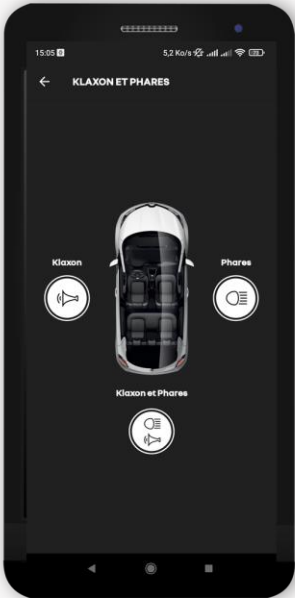

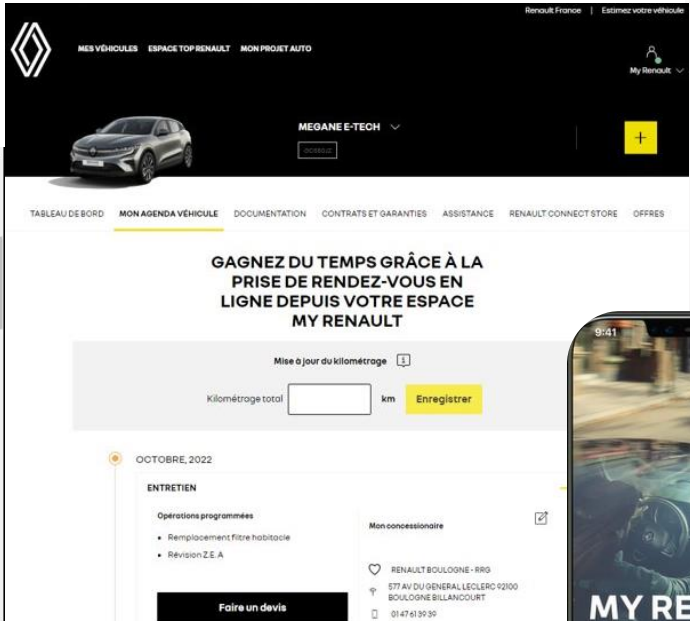

Oct 2022

...TO PERSONNALIZED CX

We started by securing the omnichannel journey and building the foundations of the future ecosystem

What we developed so far...

RG

Significant achievements & new challenges to come

Achievements

1

Customer experience enhancement

- 2,7 M Renault and 1,3 M Dacia qualified visitors*
- 1,4M logged-in users in My Brand*
- 81% of satisfaction score for My Renault users*

2

Back office & front-end optimizations

3

10+ digital platforms to support new experiences (One, Wired, GCP, Informatica, SFDC...)

4

Enriched experiences in 30+ countries

- 27M+ customers in our database
- 43M+ prospects

5

Onboard <> Offboard in progress

6

Renault, Dacia, Alpine declination

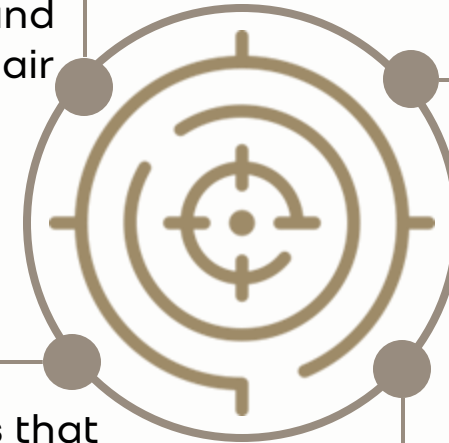

Challenges

Build **an open ecosystem** to hold new business, experience, services, mobility and partners, over the air

Enhance our omnichannel and **customer-centric approach** to better address our new targets

Build the **enablers** that will support our new strategy (i.e. holistic IS ecosystems...)

Be closer with our users by **offering personalized services, offers & experiences**

02

Which experience to emerge
profitably and permanently in mobility?

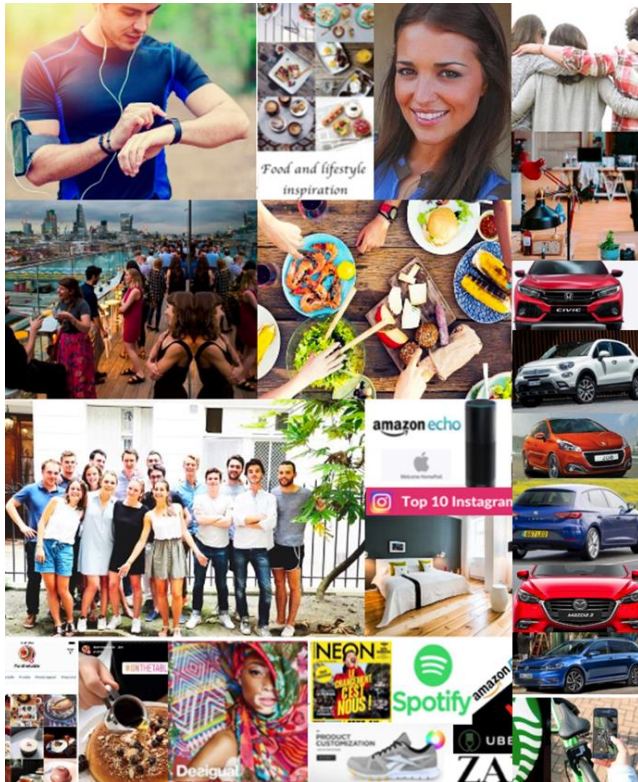

AMPÈRE EXPERIENCE STRATEGY

Renault needs to adapt its strategy to address its new customer target, the Progressive Modern Mainstream ...

Their motto : Good work-/life balance family/ partnership, leisure, social life, diversity.
And: new experiences, fun, mobility, digital lifestyle, social media, outdoor activities, trend consumption.

And: new experiences, fun, mobility, digital lifestyle, social media, outdoor activities, trend consumption.

Key differentiators

Multiplier of new trends and (urban) lifestyles

Mostly **well-educated young singles/couples**

Seeking **professional achievement** and financial success as well as **indulgence, fun, new experiences.**

Leisure oriented, sporty consumers: heavy on individualized lifestyle consumption, socializing and travel.

Typically, with **digital lifestyle.**

... and needs to manage new environmental and mobility challenges

RG

Consuming (and driving) is *acting* today!

Mobility cannot be neutral today...

From automotive to mobility: due to economic & climatic circumstances, automotive players must migrate to mobility

A plethoric offer: for our target, the multiplication of mobility offers will make it difficult to make a choice

Exploiting the Renault DNA of "cars for living": mobility must be more than a simple ease of movement

Mobility, to Bring back the Car Magic?

For Renault, mobility is a way of **extending the possibilities of the car**: to make it more **agile**, more **sustainable**, more **durable**.

Enhance Renault cars with the Inspiring Mobility experience, to make them great again in a complex environmental context.

Ampère Experience Mission: From Cars to Inspiring Mobility

“ Doing everything we can to expand the freedom to move.
We do this by creating **Inspiring Mobility**, making our **solutions more sustainable** and
positively impacting the communities we cross path with. ”

Inspiring EV Mobility
with conversations

Discover and set daily
conversation (i.e. by app) to
provoke EV Mobility usages.

From cars to
sustainable solutions

Extend EV cars with Mobility
services to make sustainable
mobility solutions.

Positive impact by
human touch

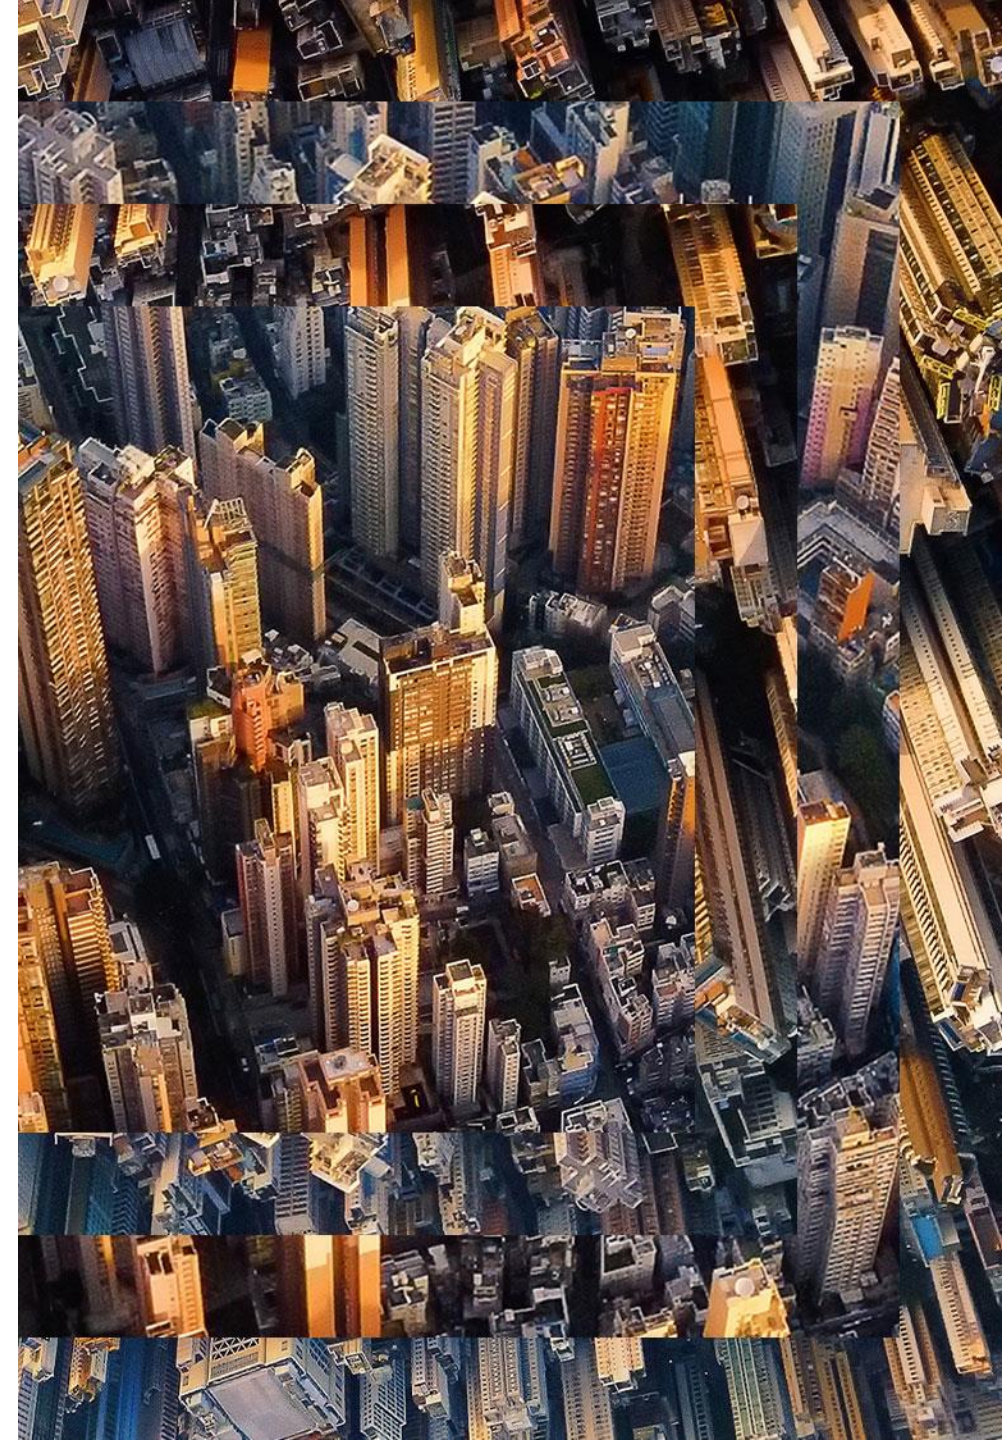

Score and coach mobility
users to help them move *on*
more positively.

03

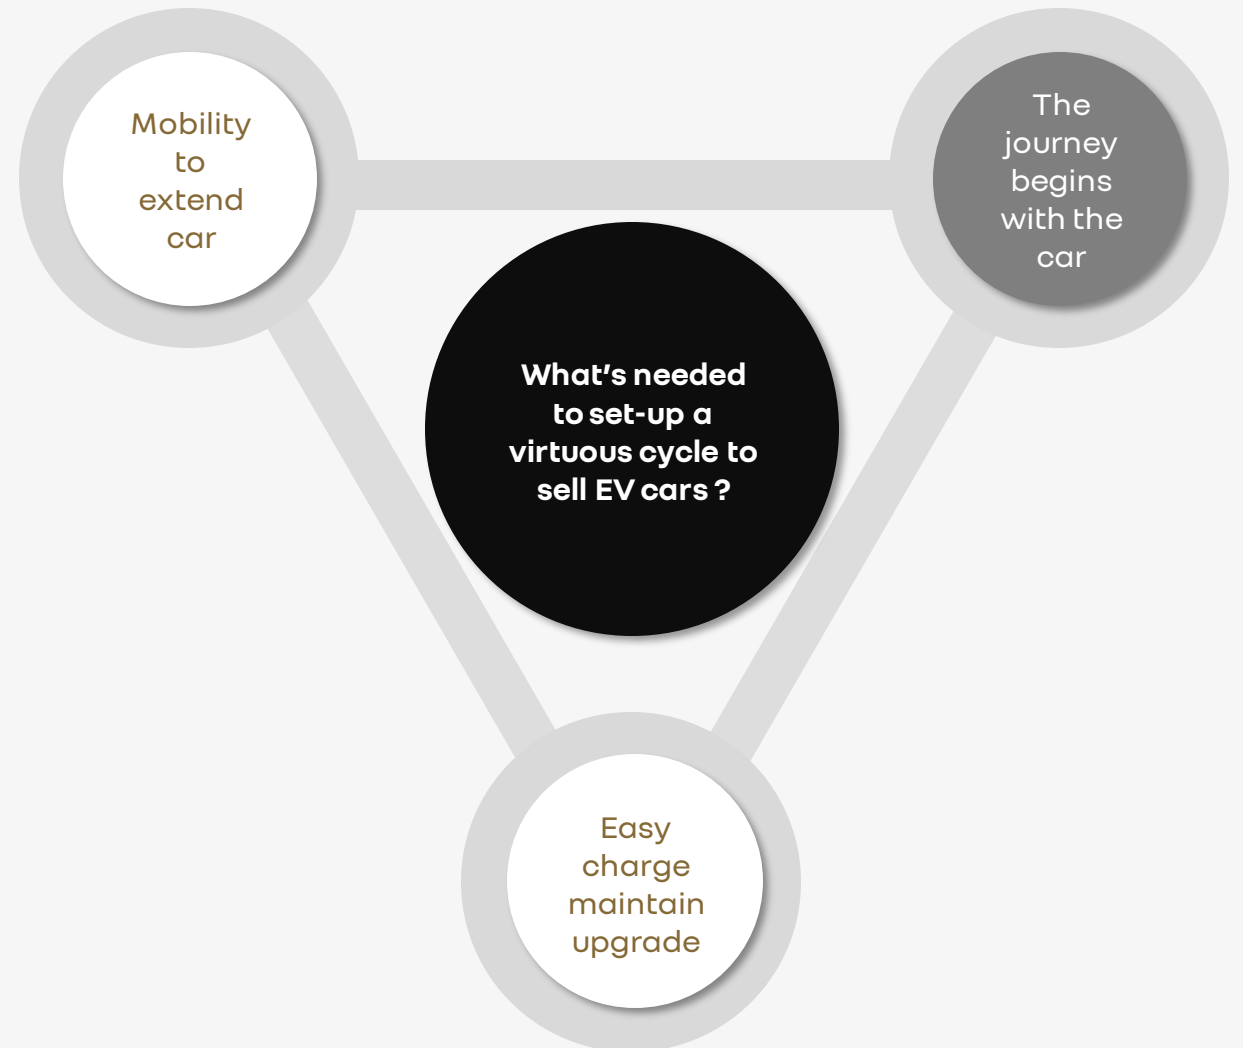

How to build Inspiring Mobility for Ampère Experience?

DCX VISION AND ROADMAP

How to build Inspiring Mobility for Ampère Experience?

How to set Ampère
Experience to sell EV cars
and extend them with
Mobility?

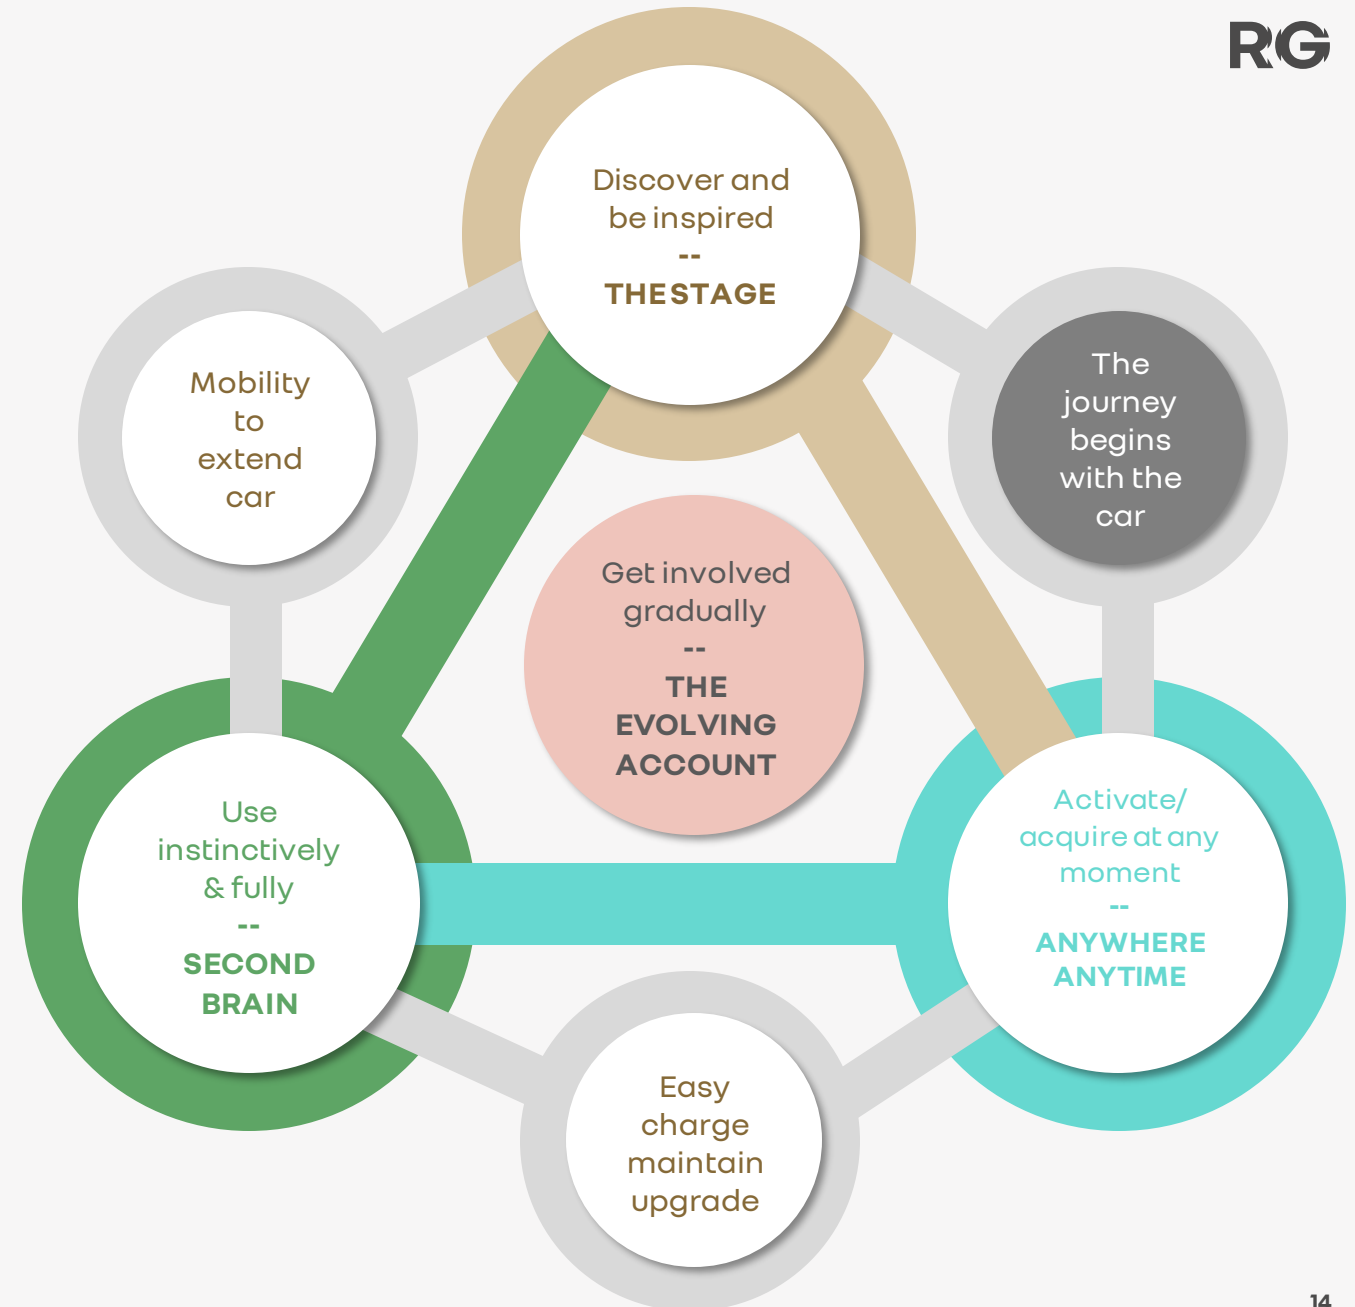

How to build Inspiring Mobility for Ampère Experience?

Ampère Experience? Inspiring overall Mobility loops to sell EV cars and beyond!

Build an inspirational ecosystem **that fits into people daily lives and daily usages.**

A **living ecosystem** that feeds and enriches itself as it goes along by **offering new experiences and new acquisition levers.**

An environment to **sell cars and mobility, improve car usage, and car maintenance as well as service upgrades and updates at anytime** in the customer journey.

How to build Inspiring Mobility for Ampère Experience?

THE STAGE: discover the solutions on a stage, like a theater.

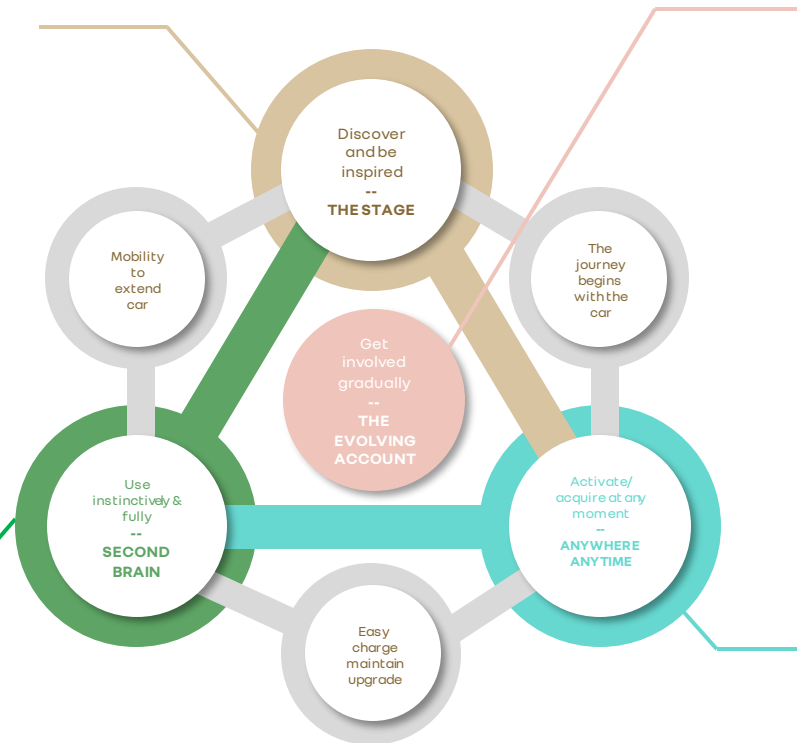

During the discovery and the usage, it is more a scene than a catalog - **lively, seasonal, illustrative of a lifestyle, embodied, inspiring.**

More than informing me, I **feel and learn things**, which can be useful for my different lives.

I often **come back to it for inspiration** (immersive PP, educational configuration...)

MY SECOND BRAIN: increases my life experience.

Intuitive, predictive, confident... to **remember**, to **connect** and to **live mobility to the fullest**. It is the **augmented memory** of my places, of my meetings (favorites, inspiration, notes, models, meetings...). It is also **my personal assistant** that helps me schedule my **maintenance**, my charge and my trips.

THE EVOLVING ACCOUNT: mastering my involvement.

Guest / Member / Activist / Boss - I can **adjust my involvement according to my needs and desires**. (loyalty, sponsorship, appreciation, connection, behavior, reward)

ANYWHERE ANYTIME: my living environment is my dealership.

Mobility solutions are **accessible** in my life, **seamlessly**. The **dealership and remote support is where I am** - at any moment, at work, on vacation, with my family and over the air if available... I can **upgrade and update** my services easily and take care of my car at any moment.

Focus on 2023 initiatives to build the Customer Experience

The Evolving account

The Stage

Anywhere, anytime

Mobility Companion

Project	2023
Enable a light process to allow user to recover its bookmarks	User portal
Manage my private life: profiles, choices, consents, notifications & communications	- Consents visualization & - Consent update (except onboard) - Notification personalization
Manage & buy products & services : contracts, documents, products (partners incl.)	- Access to my products & services - Buy, subscribe via the Store - e payment - e signature - Workshop visit
I retrieve all my transactions from the last 13 months and my dealers' appointments	Appointments
Manage a pool of user (multi-user)	- Family users - Proof of identity - Virtual key
Reset & resell journey	- Check list for helping customer when selling his car - Get infos about the buyer (new customer)
Display personalized offers inc. services & financing and partners	- Offers display - Maintenance program
Manage my claims	Claim management and follow up
Access my scoring	
Get personalized support, be alerted and notified	- OTS - Manage my notifications - Services notification & message

My dashboard

01

Me and my other circles

02

Ease access & usage between our brands & partners, client engagement

Project	2023
New discovery	- Create a discovery adapt with brand strategy - Create personalized remote support end to end - Propose a new platform for importers - Propose a car configurator for importers
Focus on EV	- Rethink EV section - Create new tools to promote EV
Rejuvenate car configurator (customer and dealer)	Adapt car configurator with new customer usage and improve efficiency
Develop service approach	Optimize integration of services and mobility to propose a usage based/need approach
Pricing and promoting strategy	- BO Dealer and reco tools to set prices at dealership - Develop ability to promote one configured car
Propose upsell and cross-sell	- Improve services and accessories integration in catalog - Propose a monthly upsell (higher configurator or service/AXS)
Reconciliate Stock and configurator approach	Reconciliate NC stock and BTO
Season Factory	Create a team to create seasonal digital content/websites
Content strategy	

Set-up the stage

01

Integrate the boutique

02

Establish seasons

Time spent, returning visitors, e-commerce basket

Project	2023
Allow user to purchase all products in one Basket (Full online; full in store or from Online to Store & Store to Online)	- Mono product Omnichannel Basket (vehicle only) - Multi products Omnichannel Basket Store to online/ online to store continuity (retrieve cart, share offer, e-signature)
Build one unique purchase funnel adaptative with all transactional use Cases	- Unified purchase funnel (finance; cash) - Track & predict for vehicle & ax - Hub to reach stores (connected services, AXS, AFS...)
Multi starting point Seamless purchase experience (Full online; full in store or from Online to Store & Store to Online)	- Open ID (all brands, MFS included) - Magic bag - Persuasive design
Allow user to book online all events type with all brand representatives	Booking online (test drive, virtual showroom, angels' appointment)
Evolutive Conversational relation with customers	- Abandoned cart rescue - Pro-active support on customer issues - EV reassurance (USE, transition, habits...)
Open to external services and product provider to enrich customer experience	
Follow my maintenance needs	- Maintenance timeline with price & booking online - Booking online - Customer communication channel - EV Battery certificate - Vehicle health certificate
Accompany renewal	

Build the bridges

01

Open the vault

02

Value my vehicle

Sales for our product & services & generate AFS leads to the network

Project	2023
Provide all important car control functionalities from anywhere, through my mobile.	- Optimize and value existing services - Look Status - Companion App - Optimized remote controls and dashboard - Follow MyF3 onboard release.
Owning a car is no more a fear. Supporting quality and upgradability	- Reinsurance and quality - OTS & QLU (quality level updates) details from my app - Upgradability - Connected services store
Simplify EV charging experience & value daily electric driving	- Valorize & smooth current EV journey - Optimized charging experience @home and @public stations (Ready AT, SOC mgt...) - Value comfort services (Notifs, HVAC...)
Accompany mobility, orchestrate associated services & content	- Enrich mobility with guide and contents - Moments by Renault - Infotainment - Routing and integrated services (Parking, Charge...)
Meet additional mobility needs	- Promote mobility offers - from 5 weeks to 5 minutes. - Create product suite to value all services
Help me be better	- Improve my skills & efficiency - ADAS knowledge - Digital user Manual - Driving summary

Unlock my vehicle potential

01

Ease my EV charging life

02

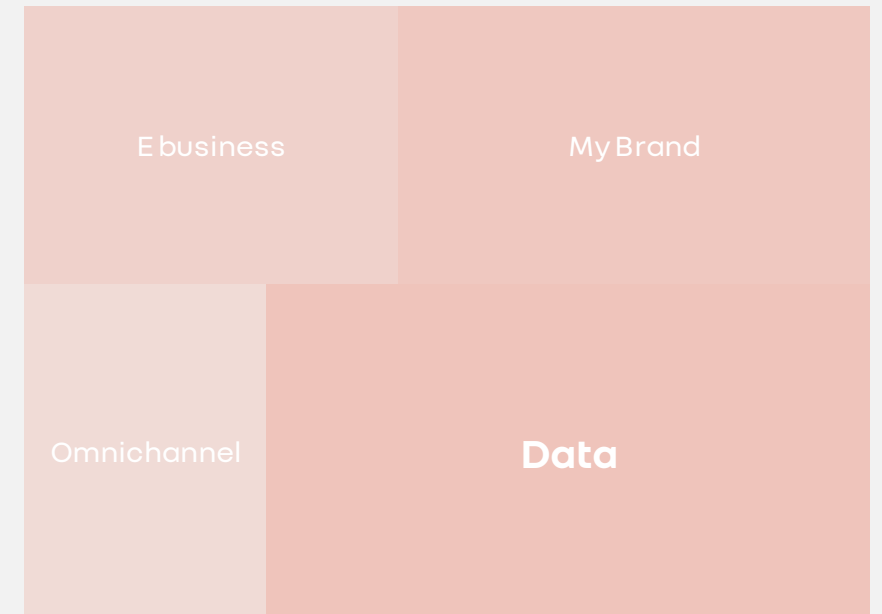

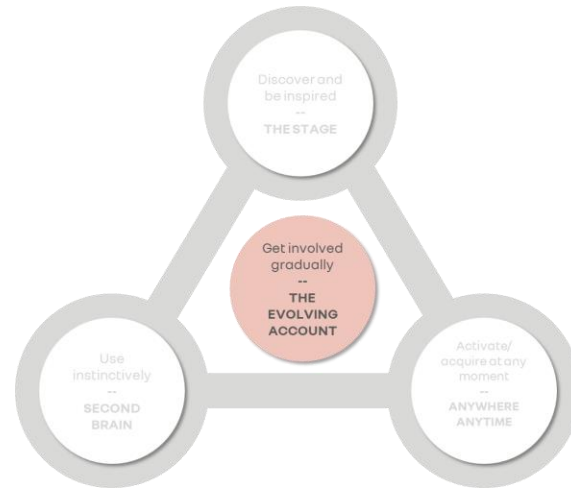

Bright my mobility

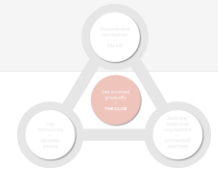

Raise engagement and usage of our products & services

A. The Evolving Account

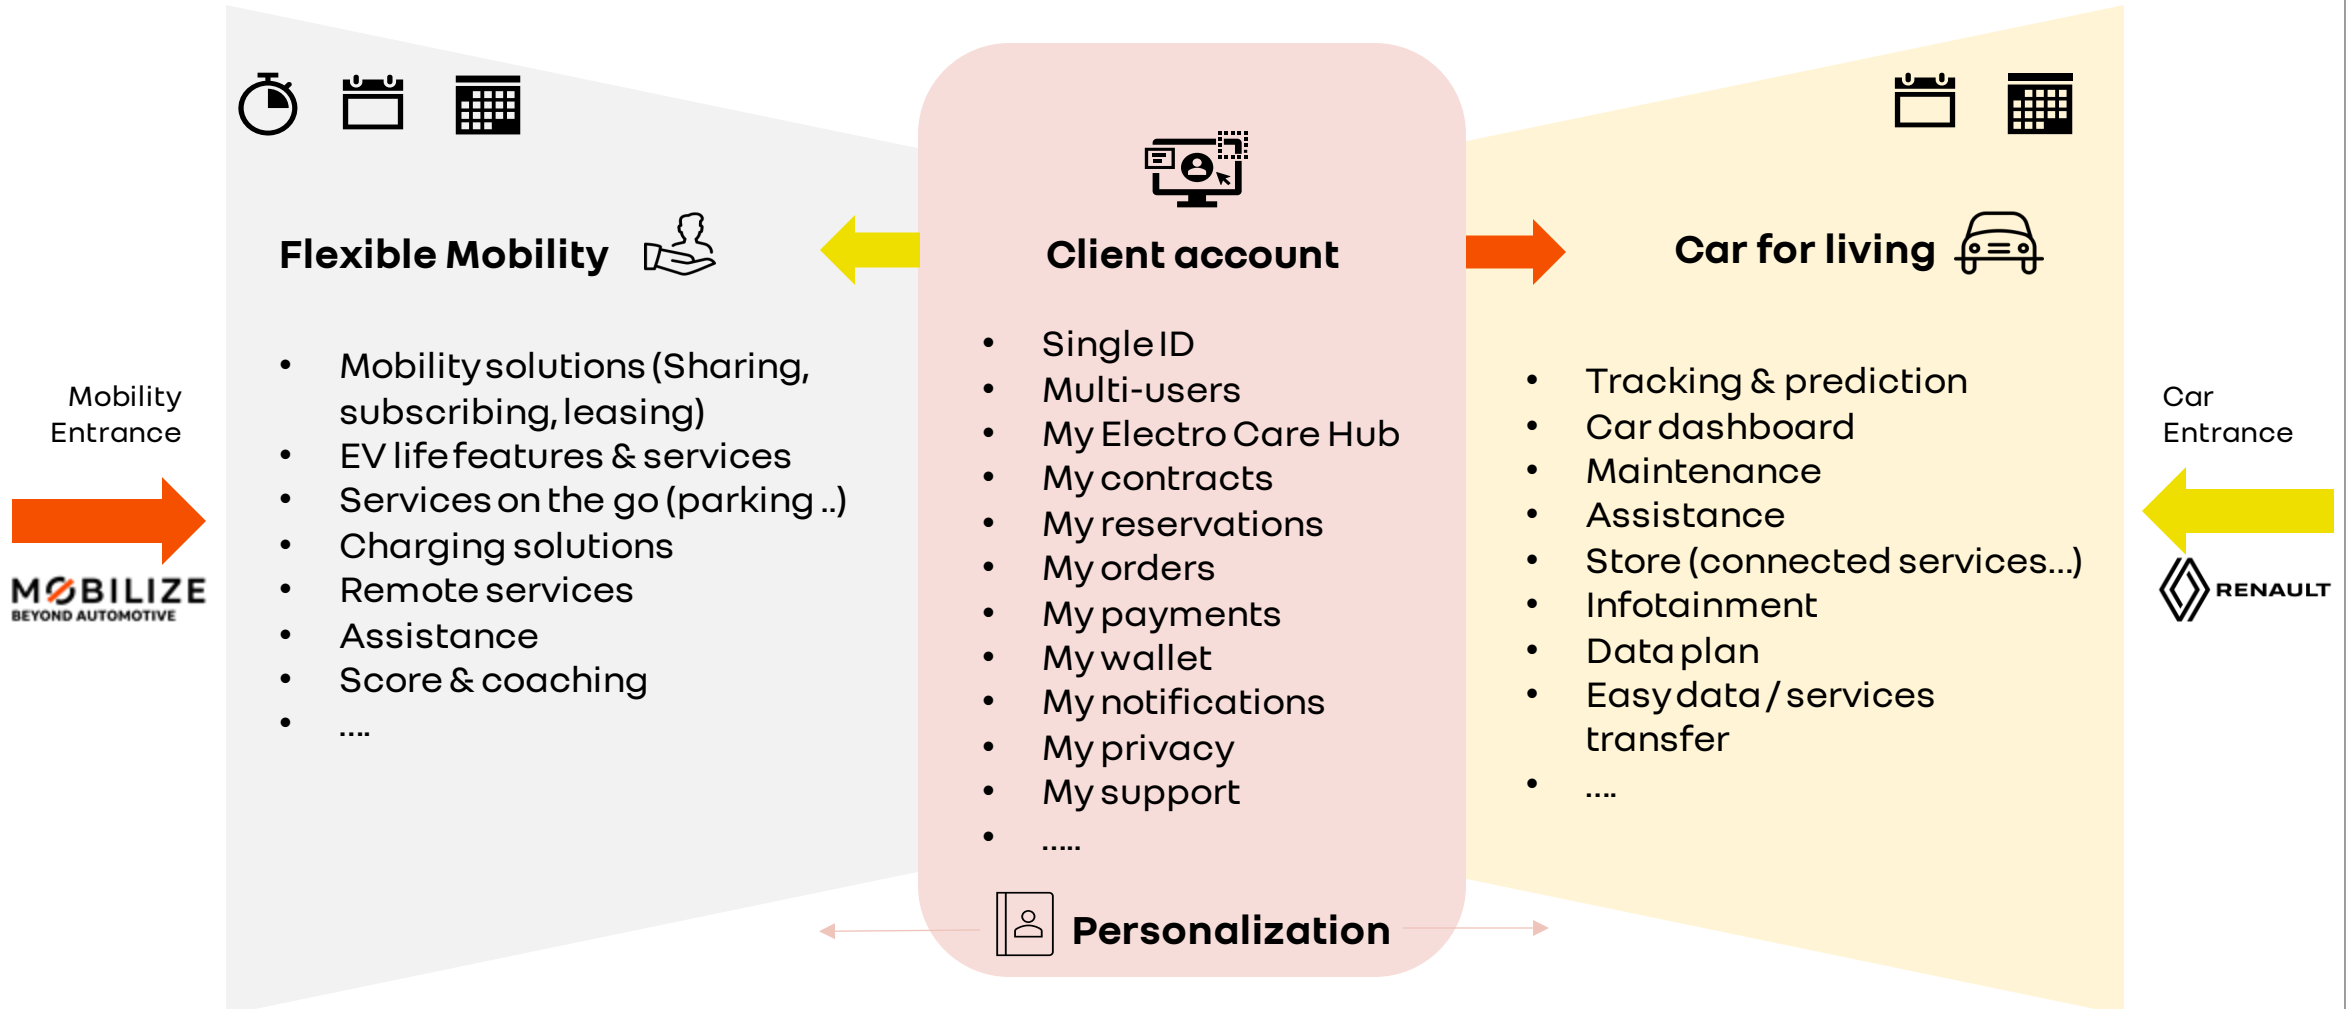

Get involved gradually

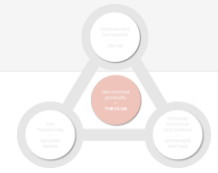

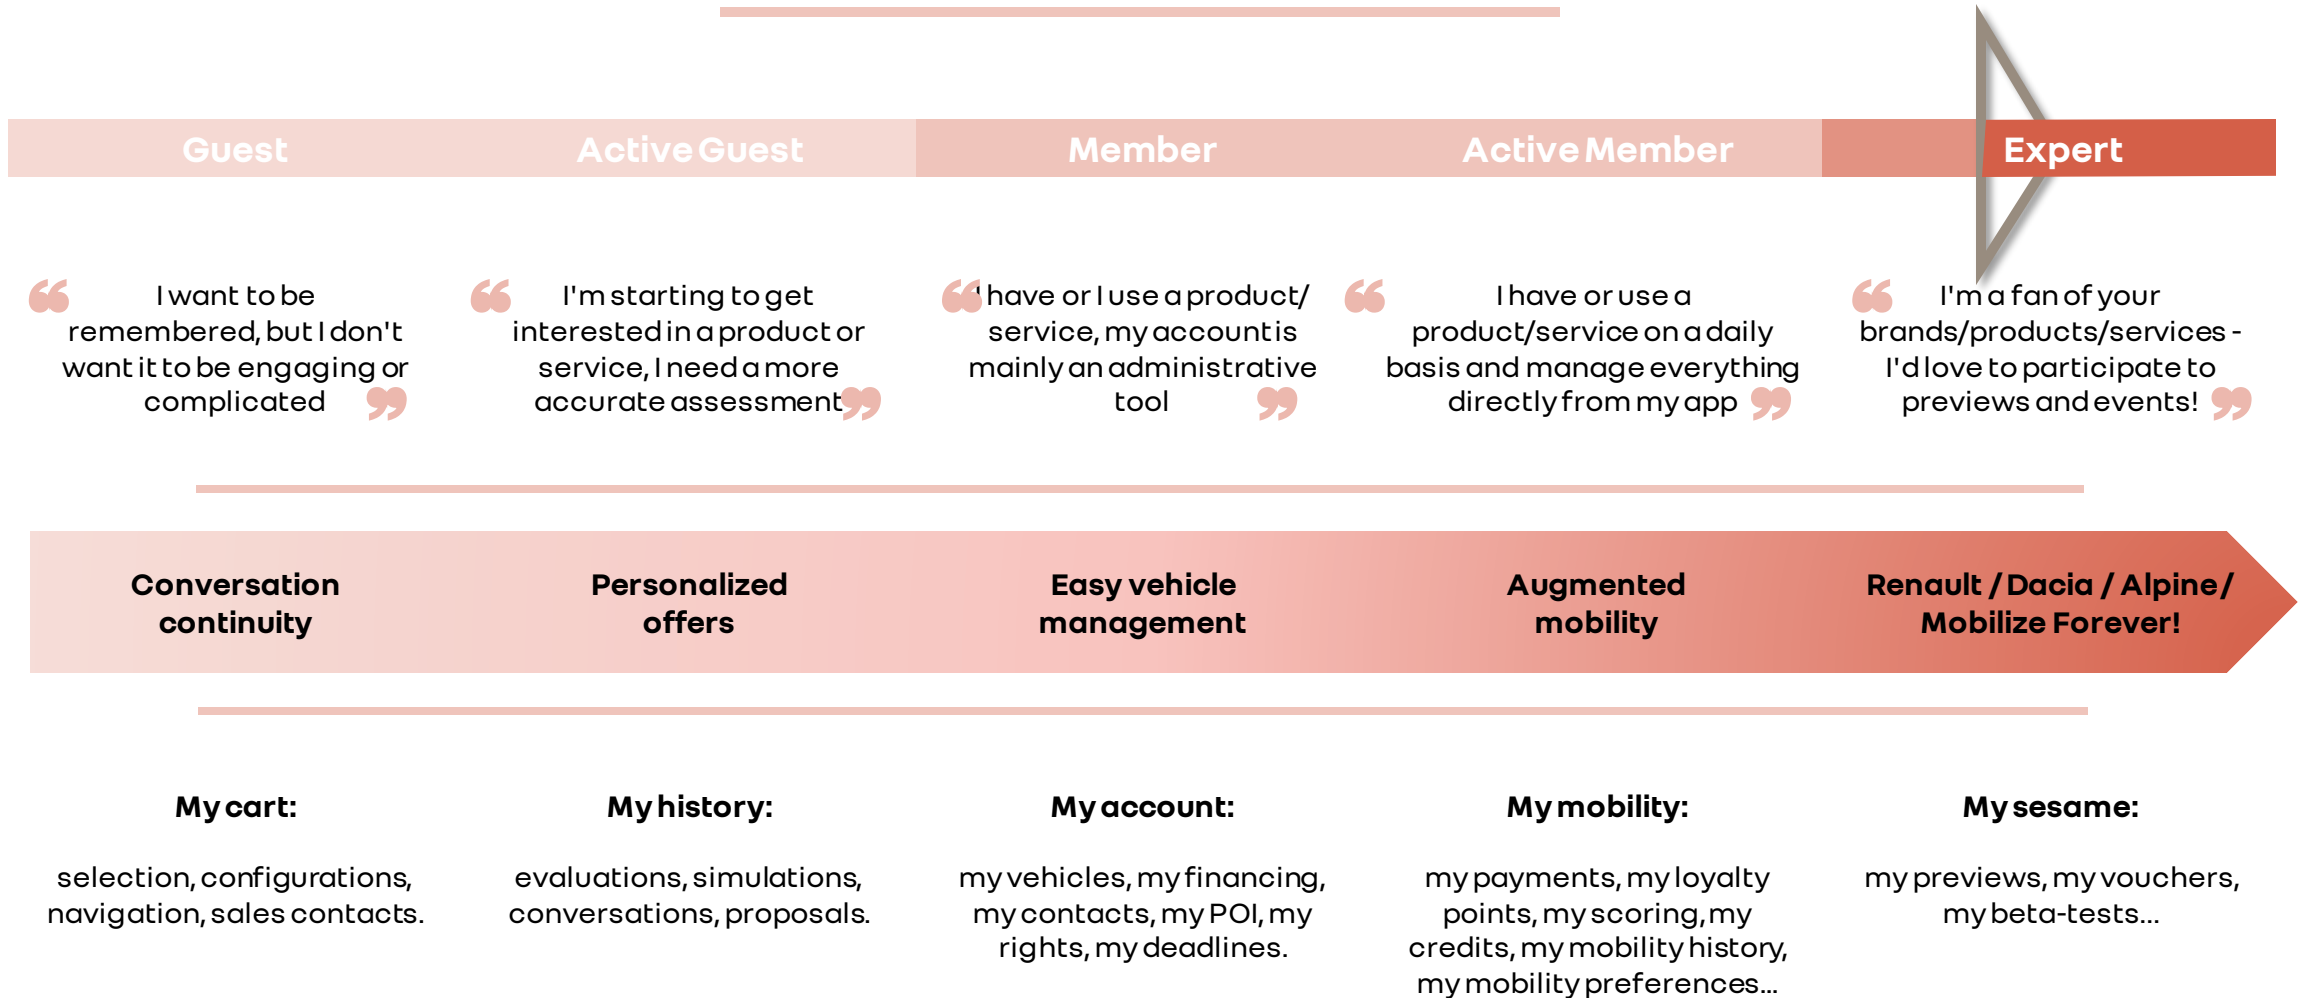

Focus on **The Evolving Account**

One account for Usership, Ownership and more

Focus on The Evolving Account From guest to expert

The Evolving account - the progressive account experience to support and reward your engagement, from guest to patron

“

I want to be pampered, to feel at home, to feel confident to connect and interconnect...

”

01

Setting up the space to support the consistency all along the user journey:

Offer a space by consolidating customer data all along the customer journey, from exploration to renew.

02

Managing the multiple users to support user 1st pool of members and other pools in their daily life. Propagate and manage services to members of its community.

03

Supporting the progression to help the user to move from guest to active member: Develop engagement by hyper personalization and by letting the user customize his account according to his needs.

Roadmap

2023 / 2024

01

Foundations 1/3: **conversational space > single ID & SSO - one account for my whole experience.**

01

Foundations 2/3: **conversational space > Trust and legal issues** (authent. Consent. Transact...)

01

Foundations 3/3: **conversational space > Centralization & Management** (contracts, documents, products ...)

02

Daily Integration 1/2: **In the user's life > Sharing management**

02

Daily Integration 2/2: **In the user's life > Mobility and EV management** (Dashboard, Scoring)

+ 2025

03

Hyper personalization: **Engagement through growth > rewarding experience markers**

Roadmap to reach the target

	Project	Services/Features			Enablers	Dependencies
		2023	2024	2025		
01 My dashboard	Enable a light process to allow user to recover its wish lists in a virtual cart	User portal			- RTC - Gygia	DOBA/ROBA
	Manage my private life: profiles, choices, consents, notifications & communications	- Consents visualization & Consent update (except onboard) - Notification personalization	Merge several accounts	Consent update onboard	- ID Connect - RTC / RUCH - Notif Center - Single ID - Open Id	- Long Cycle (on board consents) - GDPR/BCSI
	Manage & buy products & services : contracts, documents, products (partners incl.)	- Access to my products & services - Buy, subscribe via the Store - e payment - e signature - Workshop visit	- e signature with associated documents - Reset & Resell contracts	Suggestion to update the dashboard	- Open ID - Contract Referential (TBC) - RDOC - Docusign - Store	- Partners - Customer Journey - Interactions with MFS & Partners
	I retrieve all my transactions from the last 13 months and my dealers' appointments	Appointments	Transactions		- Transaction Referential (TBC) - Wallet	- RBOK - Vegas/CNR(Contract referential)
02 Me and my other circles	Manage a pool of user (multi-user)	- Family users - Proof of identity - Virtual key	- Small "businesses" - Proof of ownership	Remote commands	- RTC / RUCH / ROL - KYC	
	Reset & resell journey	- Check list for helping customer when selling his car - Get infos about the buyer (new customer)	Moment "Sell my car"	- Allow data transfer - Allow portability	RTC	- VO Team - Dealer
03 Perso and brand dialog	Display personalized offers inc. services & financing and partners	- Offers display - Maintenance program			- Adobe Campaign - RUBICS / RTC	Consistency with CRM
	Manage my claims	Claim management and follow up			SFDC	RForce
	Access my scoring	Scoring on 1 dimension	Several dimension scoring			Marketing DataHub/CAP
	Get personalized support, be alerted and notified	- OTS - Manage my notifications - Services notification & message	Avatar MVP	Avatar	Notif Center	- Long Cycle - Avatar

Data Strategy

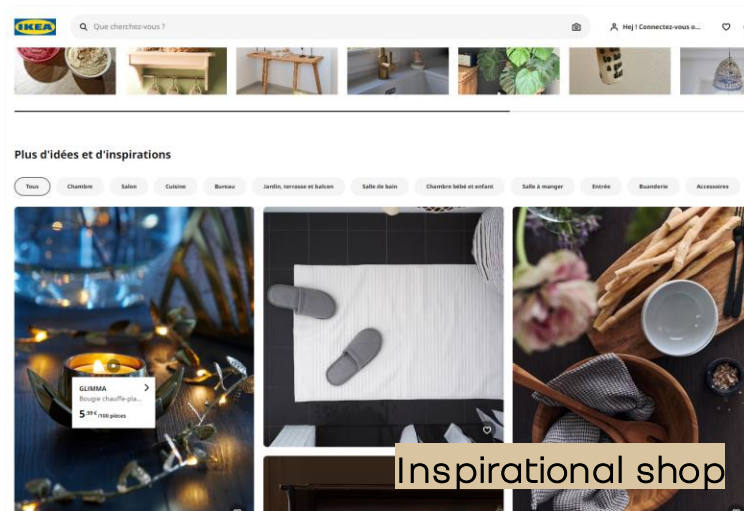

B. The Stage

Discover and be inspired

Focus on The Stage

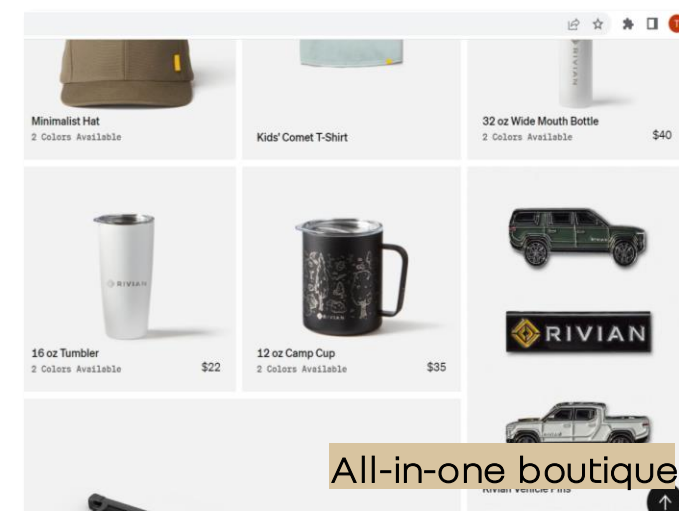

A stage to inspire

Inspirational shop

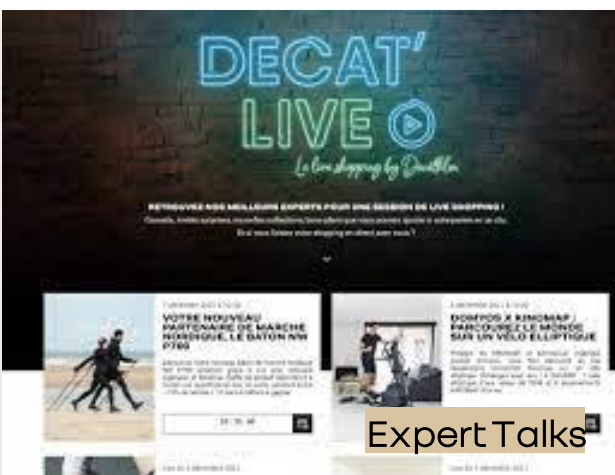

Products on the stage

All-in-one boutique

Immersive Experience

Expert Talks

Seasonal content

The Stage - Moving from the custom catalog to the stage to inspire

“

I want to be inspired, I want to learn, I want to be amazed! If it's just product information, I have Google for that!

”

01

Set-up the stage to inspire the guest : Showcase solutions to inspire the user, with scenes that present products and services in use. (PP solutions, customized, educational configuration...). The stage is gradually personalized according to the account status.

02

Integrate the boutique to facilitate appropriation by the user. The selection of solutions is easy, the selection modes are accessible and progressive (selection, basket and consolidated prices, consolidated products...)

03

Establish seasons to develop proximity for the returning member : If the main mission of the site is to conquer new targets, it must continue to inspire customers to propose new uses and services by becoming a major stage for launches and announcements.

Roadmap

2023 / 2024

01

Foundations 1/2: **Set-up the stage > Specific brand discovery and personalization.**

01

Foundations 2/2: **Set-up the stage > EV & mobility Contents & Services centricity**

02

Engagement 1/2: **Integrate boutique > Pricing strategy and integrated experience on NCI/UCI**

02

Engagement 2/2: **Integrate boutique > all-in-one selection and basket** (Cars, Finance, Services...)

+ 2025

03

Fidelity: **Establish seasons > Stages to upsell mobility and new products.**

Roadmap to reach the target

	Project	Services/Features			Enablers	Dependencies
		2023	2024	2025		
01 Set-up the stage	New discovery	- Create a discovery adapt with brand strategy - Create personalized remote support end to end	- Adapt the discovery for each customer (personalization) - Persuasive design	Extend theater in the street and every phygital touch points	- CMS - Content	Clear brand strategy and brand guidelines (including Mobilize)
	Focus on EV	- Propose a new platform for importers - Propose a car configurator for importers	- Rethink Pro/LCV section - deploy a digital and virtual for NC and UC - New digital environment for dealer and remote			Clarify digital strategy for importers (tools and contracts)
	Rejuvenate car configurator (customer and dealer)	- Rethink EV section - Create new tools to promote EV	Rethink network animation & role overall EV lifecycle		- CMS - EV tools	Ampère strategy
	Develop service approach	Adapt car configurator with new customer usage and improve efficiency	AR/VR for car configurator		- Car configurator/CSB 3D/Unreal Engine	New CSB backlog
02 Integrate the boutique		Optimize integration of services and mobility to propose a usage based/need approach	Allow dealers and remote teams sell services and mobility in a usage based/ need approach		CMS	Clarification of the strategy for services (Mobilize, Ampere, MFS, Brand)
	Pricing and promoting strategy	- BO Dealer and reco tools to set prices at dealership - Develop ability to promote one configured car	- Direct sale impacts - Allow remote teams to pro-actively contact prospect to present promote vehicle		- BO dealer and Reco Tools - Car configurator	Clarification of the strategy for direct sales
	Propose upsell and cross-sell	- Improve services and accessories integration in catalog - Propose a monthly upsell (higher configurator or service/AXS)	- Adapt catalog to customer - Integrate all services (car, finance, customer centric) as a part of the journey (catalog)	Include EV charging plan subscription	- PIM for services - Over the Air Features activation/deactivation	Clarify the services online buying process for Mobilize (link with brandsites ?)
03 establish seasons	Reconciliate Stock and configurator approach	Reconciliate NC stock and BTO	Reconciliate UC Stock with NC and BTO		- Car configurator/NCI/UCI - CSB/new CSB	
	Content strategy & structuration	- Structure and give access to usage & help content Season factory: Create a team to create seasonal digital content/websites	Create and propose to countries a database of accessible content to activate their websites		CMS, content organization	Work with RAC

C.

Anywhere,
anytime

Activate and acquire at any moment

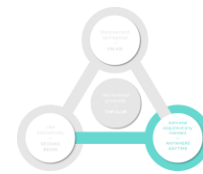

E business

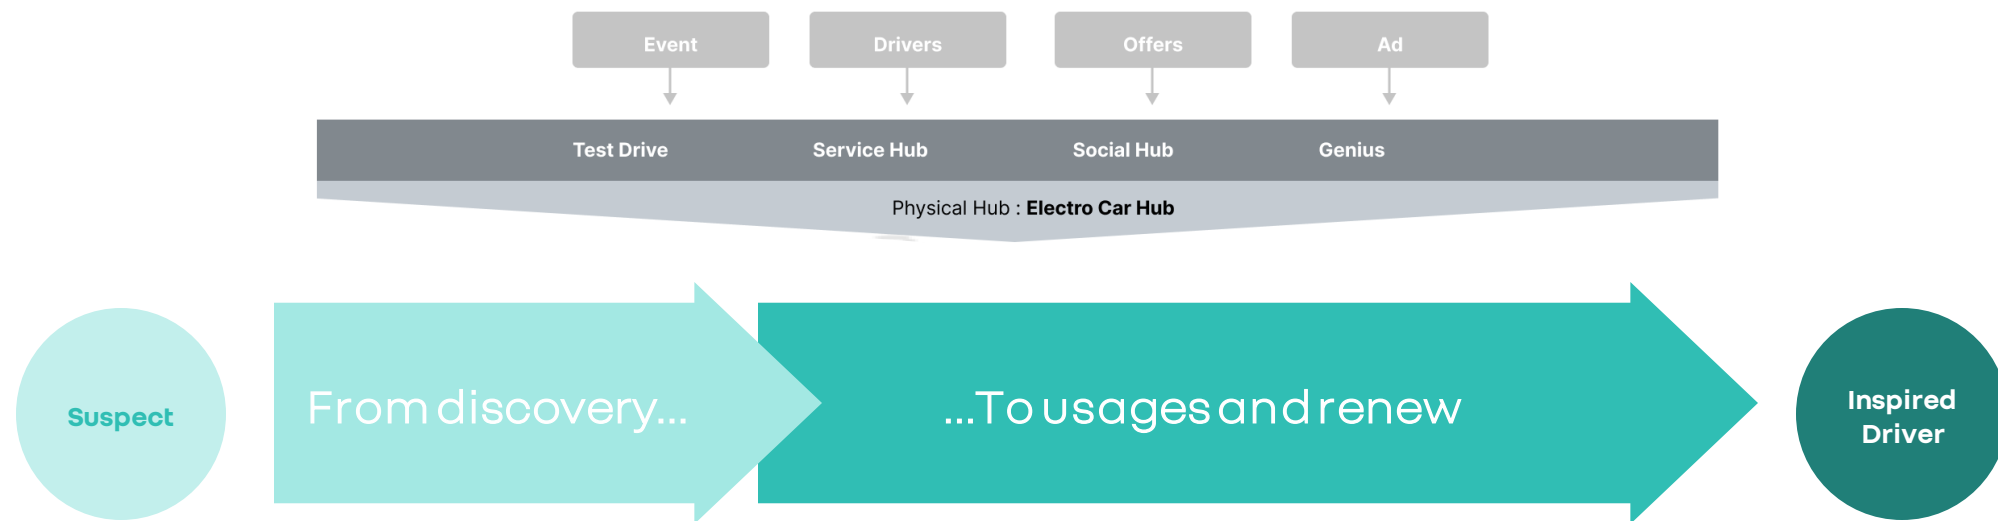

My Brand

Omnichannel

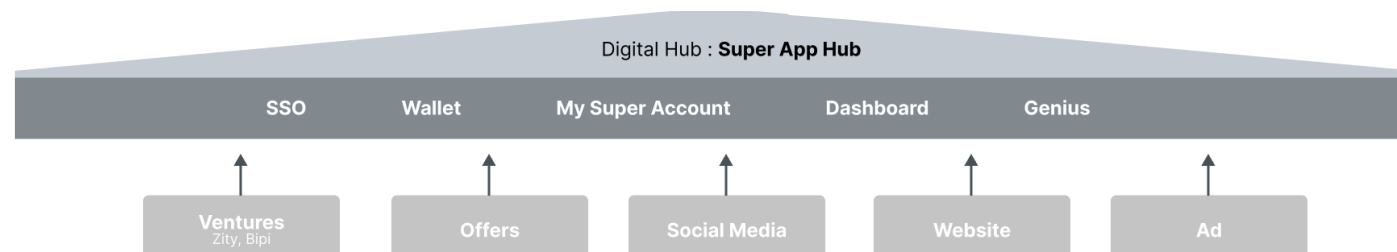

Data

Focus on **The Magic Bag** Anywhere, anytime my mobility solutions

Thanks to my evolving account and an omnichannel ecosystem,
I get anywhere, anytime my car and my mobility solutions: *my own environment is my mobility provider.*

Anytime, anywhere - the cashless experience to get anywhere, anytime my mobility solutions

“

I don't have time... to waste time! - I want to focus on my life, my experiences, my uses

”

01

Bridging the physical to digital to offer continuity for the guest: Set up the foundations of the phygital dealership.

02

APIzation to connect everything into one single vault for the member: Implementing open connectors to extend the possible offers beyond the Renault Group in order to enrich the offer and make it versatile and divers.

03

One unique omnichannel marketplace for all boutiques (all in one basket) **for a unified purchase experience.** Smooth out all purchase moment for all products tangible and intangible, with versatile payment solution (cash payment, financing and subscriptions) on overall customer relationship with the brand.

Roadmap

2023/2024

01

Phygitalization 1/3: **Build the bridges > mono-product omnichannel basket from CRM campaign**

01

Phygitalization 2/3: **Build the bridges > omni-product omnichannel basket**

01

Evolutive conversational approach: **Build the conversational bridges > The evolving conversation**

02

APIzation: **Open (securely) the vault > Unified basket for everything**

01

Phygitalization 3/3: **Build the bridges > Over The Air update/upgrade/on demand/ unified Basket for everything (subscription included)**

+ 2025

03

Magic bag deployment acceleration: **Cashless experience > G5 market countries for all brands**

Roadmap to reach the target

Build the bridges

01

02 Open the vault

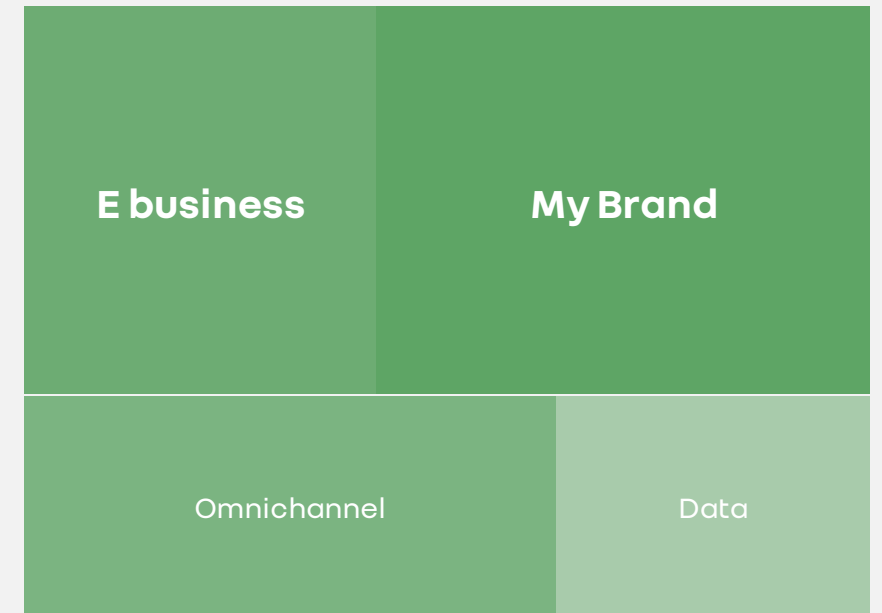

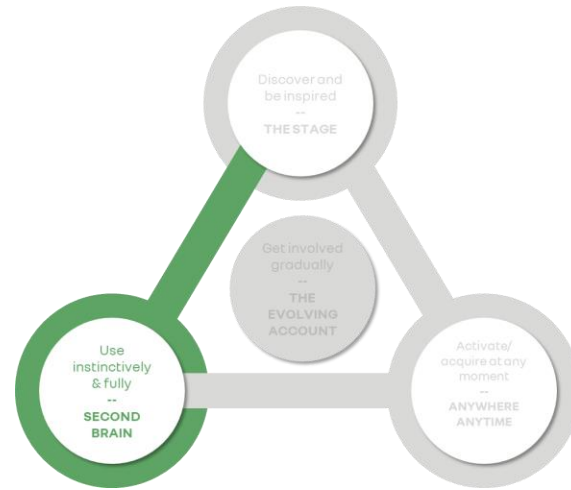

03 Value my vehicle

Project	Services/Features			Requirement needed	Dependencies
	2023	2024	+2025		
Allow user to purchase all products in one basket (Full online; full in store or from Online to Store & Store to Online)	- Mono product Omnichannel Basket (vehicle only) - Multi products Omnichannel Basket Store to online/ online to store continuity (retrieve cart, share offer, e-signature)	- Omni-product Omnichannel Basket (subscription included) - Trade-in appraisal (government energetic transition incentive compliancy simulator)	Omnichannel subscription portability	- Define the new subscription offers - Define direct sales strategy - Who launches the fabrication for BTO? (dealer/OEM?)	- My auto project, Gravity, - API connection with local sales tools - MFS; Tekion
Build one unique purchase funnel adaptative with all transactional use Cases	- Unified purchase funnel (finance; cash) - Centralized payment - Track & predict for vehicle (more content & offers) - Hub to reach stores (connected services, AXS, AFS...)	- Unified purchase funnel (finance; cash; subscription) including accessories and services; Over The Air - Unified store - Unified payment - Track & predict for vehicle & AXS	- Cashless experience funnel - Over The Air	- Rebuild all purchase funnel in one. - Rationalization of external payment providers - Over the air strategy? Activation deactivation - Payment services	- MFS; Onboard vehicle enginery (Over The Air) - Tekion
Multi starting point Seamless purchase experience (Full online; full in store or from Online to Store & Store to Online)	- Open ID (all brands, MFS included) - Magic bag - Persuasive design			- Define the network's role play for EV - Redefine Network incentive model	MFS, RTC, MY BRAND, ONE, My auto project, Tekion
Allow user to book online all events type with all brand representatives	Booking online (test drive, virtual showroom, angels' appointment)	Booking online (all events)			One, Gravity, RBok, Tekion
Evolutive Conversational relation with customers	- Abandoned cart rescue - Pro-active support on customer issues - EV reassurance (USE, transition, habits,...)	CRM & Personalized Automated product suggestion based on DATA, profiling and look alike	User stimulation pressure management	Clarification of the role and vision for angels by the BU	- RForce, training, One, Gravity - CRM, DATA crunching - Profiling model - Notification center
Open to external services and product provider to enrich customer experience		External partner product provider	External partner product provider	RCES, VEGAS, FOTA	Onboard vehicle enginery
Follow my maintenance needs	- Maintenance timeline with price & booking online - Booking online - Customer communication channel				
Accompany renewal & increase retention	- EV Battery certificate - Vehicle health certificate		FOTA Software Upgrade portability		

Definitions : Mono product: vehicle only; Multi product: vehicle, accessories, services, trade-in; omni-product: all products tangible and intangible subscription plan included

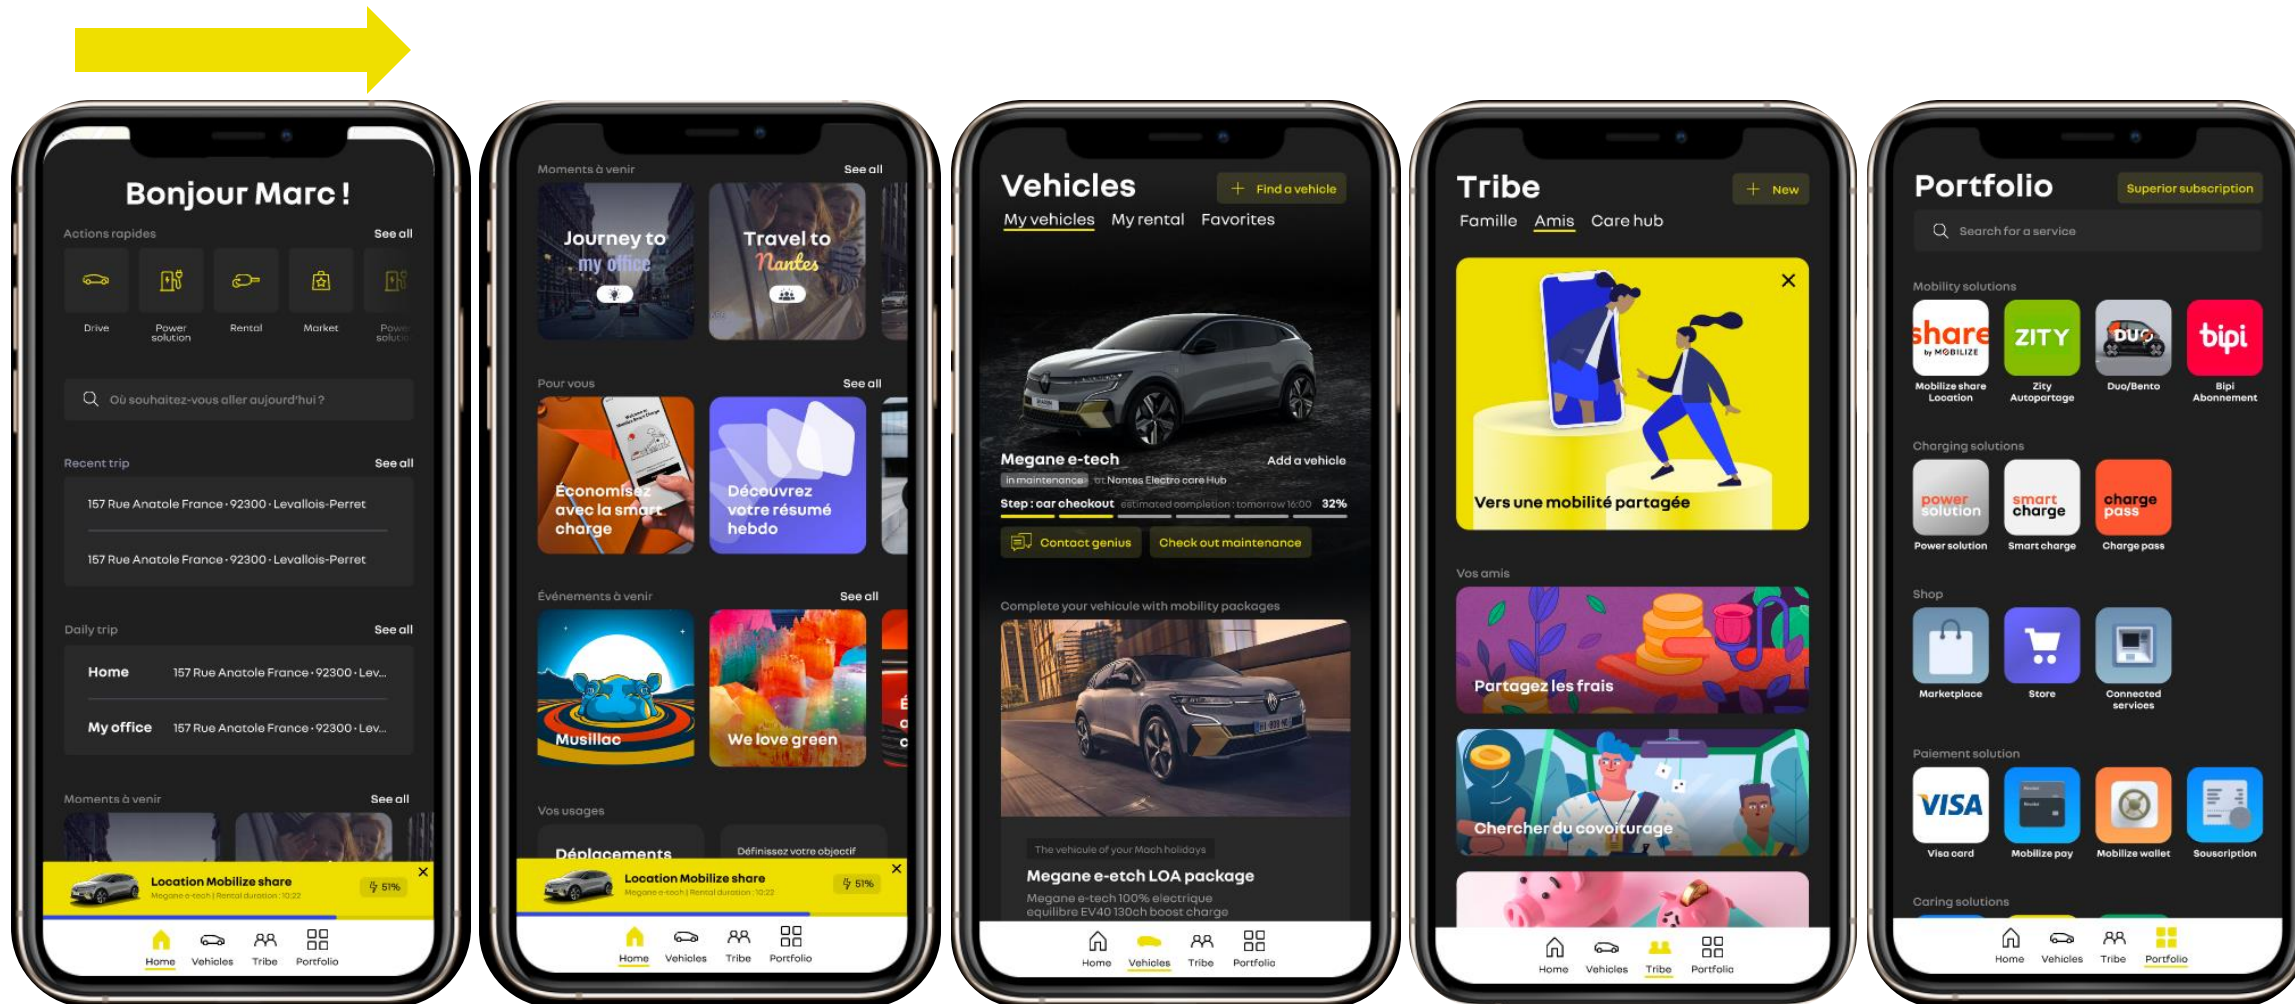

D. The Second Brain

Use instinctively & fully

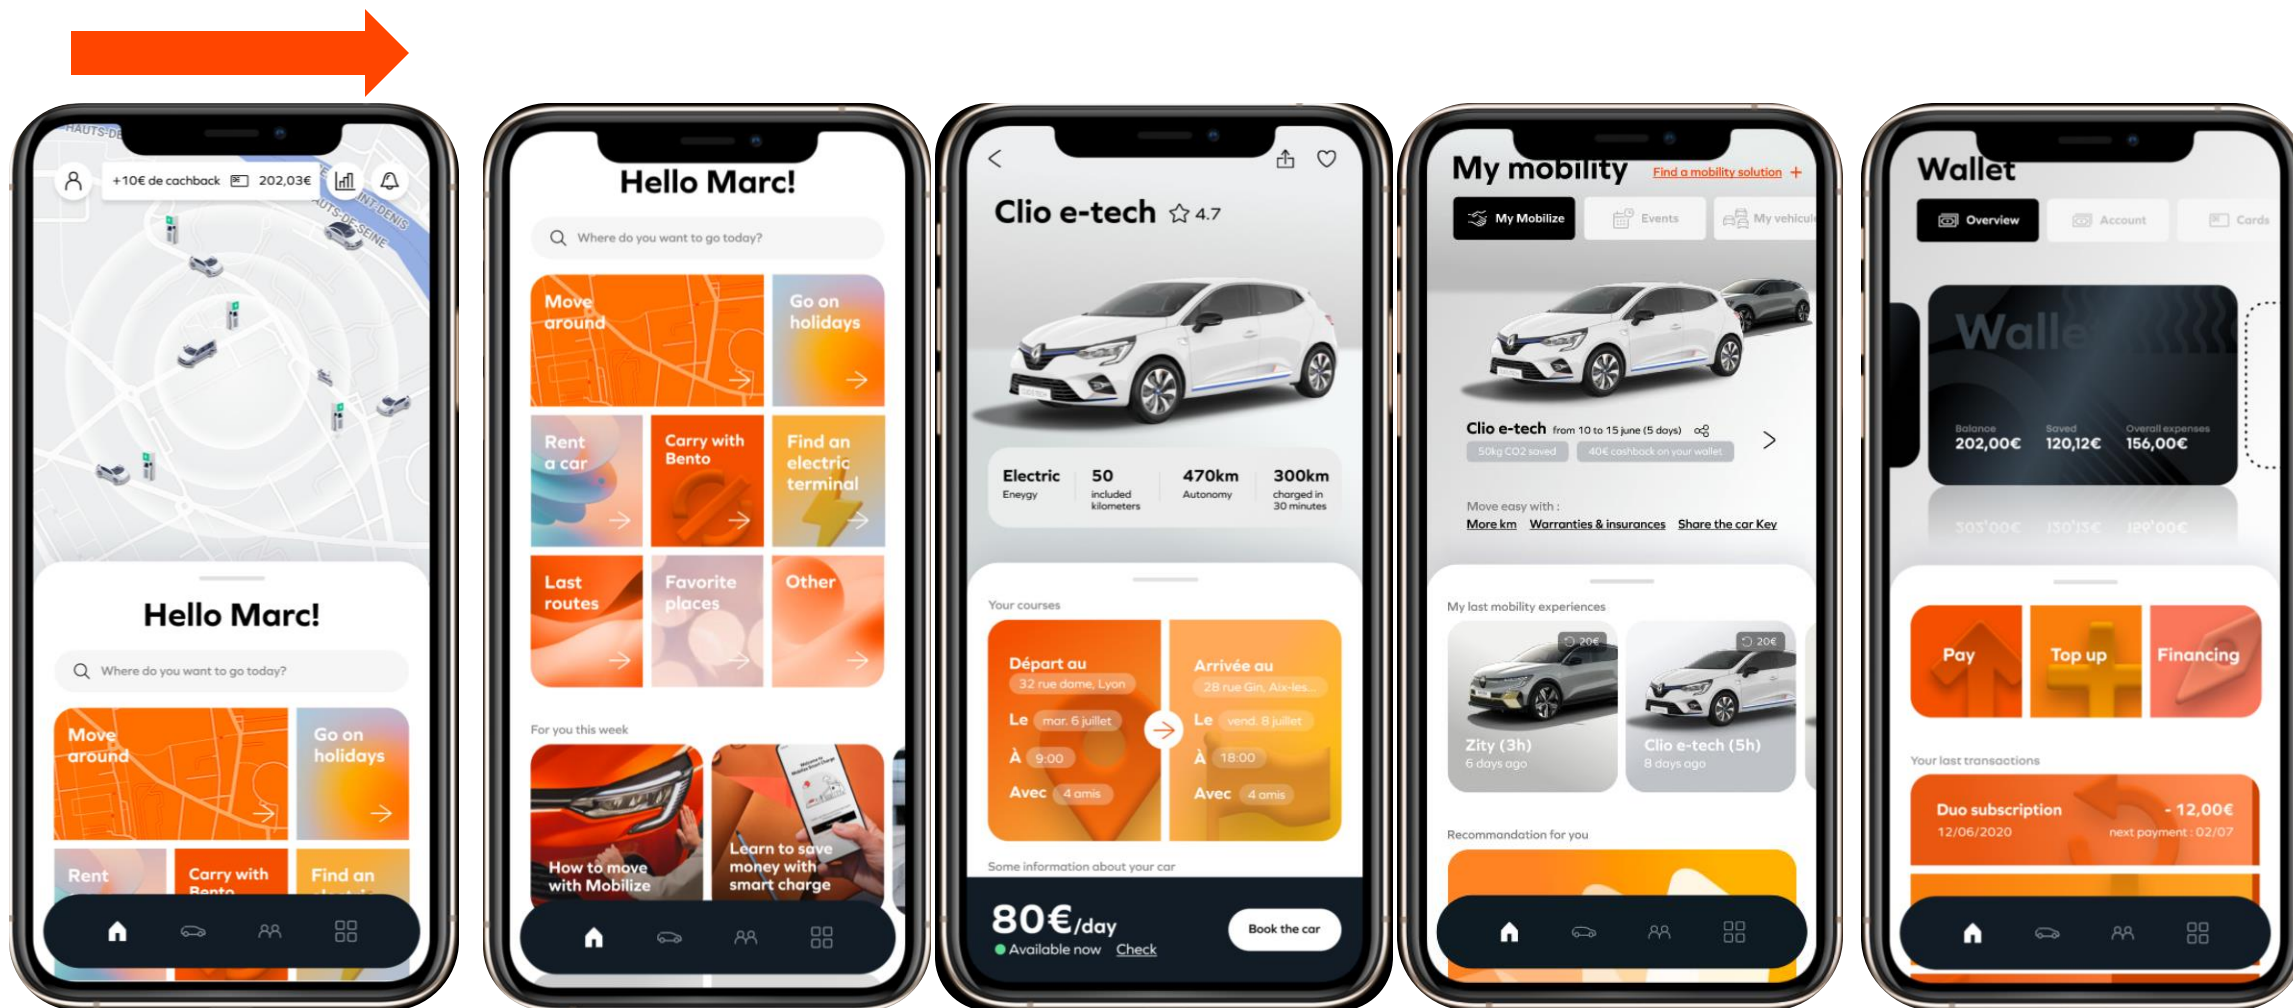

Focus on The Second Brain

My personal AI to move on!

Focus on The Second Brain

My personal AI to move on!

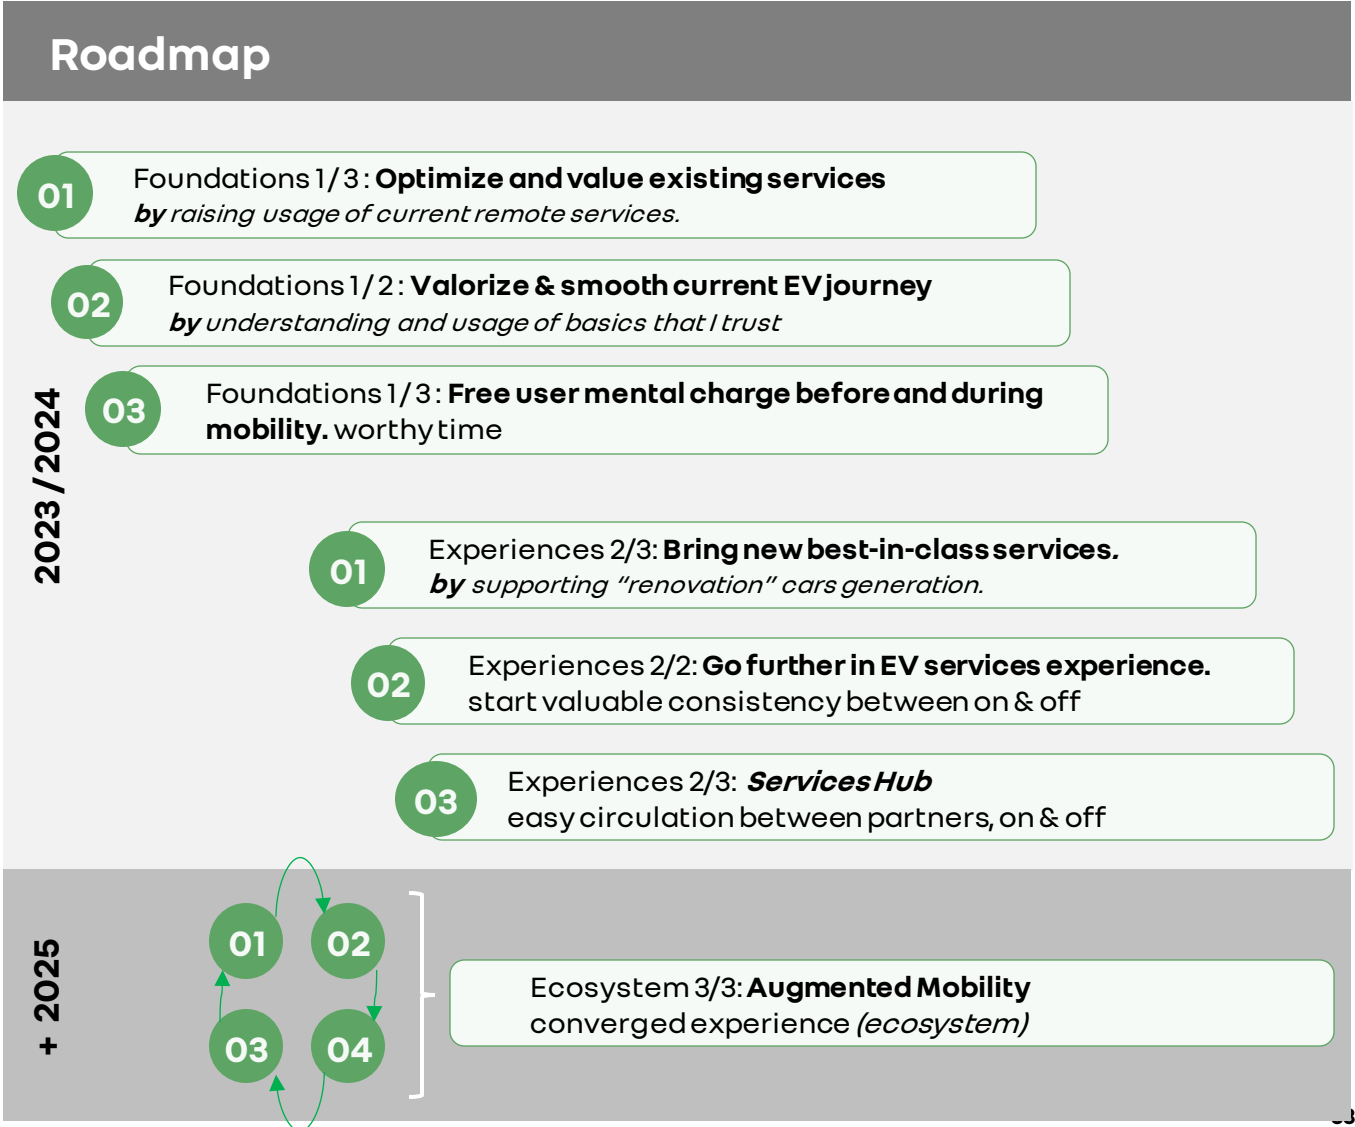

From a car to a global ecosystem that integrates my mobility in my daily connected ecosystem

“I have a great car, I want to explore its full potential. I don't just want an app. I need a 'second brain' to help me focus on my life, rather than on an airplane dashboard!”

- 01 Unlock my vehicle potential:** expand the potential of the car with a complete connected ecosystem.
- 02 Ease my EV charging life:** as an electric pioneer deliver EV reliable and seamless experience.
- 03 Bright my mobility:** accompany mobility, orchestrate services & content within and without our cars.
- 04 Help me be safer & more efficient:** develop my skills & mobility power

ROADMAP TO REACH THE TARGET

		Services/Features				Enablers & Dependencies
		2022	2023	2024	2025	
01	Unlock my vehicle potential	Provide all important car control functionalities from anywhere, through my mobile. - Set up wizard x My Renault pairing - Companion app for trusted device functions: messaging and calendar sync - Remote horn & lights - Tyre pressure (CCS1 Only) - Charge history	Optimize and value existing services - Lock Status - Companion App - Optimized remote controls and dashboard - Virtual Key - Follow MyF3 onboard release.	Bring new best-in-class services - On-Off continuity - Enable valuable functionalities (eg. R EngineStart, R LockUnlock) - Follow MyF4 onboard release.	A global ecosystem that leads to converged experience My Car is part of my digital ecosystem and can be remotely managed. I can optimize my mobility using my car connectivity. Releases notes & details of my onboard system Charging is integrated seamlessly in the user daily mobility journeys. Energy management is a global pattern EV bring value and not pain. Mobility is personalized and does integrate all services available in my ecosystem I can trust my "second brain" to enrich and optimize all my journeys. All my mobility offers are integrated in the same path Coaching 360° within the user mobility journey	- Redesign My brand car page to enhance & value remote experience - Consolidate pairing process to raise paired vehicles rate
	Owning a car is no longer a fear. Supporting quality and upgradability	- OTS - Service contracts and warranty ext. - Data connectivity Orange (portal link, pack status, Open ID)	Reinsurance and quality - OTS & QLU (quality level updates) details from my app - Upgradability - Incident declaration - Connected services store	Value upgradability - Release notes and valorization of "on" and "off" board upgrades Reinsurance and quality - Status check and MIL		- FOTA, SDV1, GAS - Integrate connected services store - Build a transversal Wallet usable for all services
02	Ease my EV charging life	Simplify EV charging experience & value daily electric driving - Mobilize Charge Pass (incl. Stand alone, gift card, subscription) - EV Battery Certificate	Valorize & smooth current EV journey - Optimized charging experience @home and @public stations (Ready AT, SOC mgt..) - Value comfort services (Notifs, HVAC...)	- Integrates new ways of charging - Global energy management experience incl. new charging usages (V2G, WB, P&C..)		- Build Onboard / Offboard consistency, - and impact onboard design with valuable E2E experience - Renault as an electric brand pioneer with services from vehicle, wallbox ...
03	Bright my mobility	Accompany mobility, orchestrate associated services & contents - Single ID & Open ID (6 countries) - Hub stores app (connected services, warranty & maintenance contracts, AXS, Charge pass) - Moments pilot on/Off - What's app Renault Assistance	Enrich mobility with guide and contents - Moments by Renault - Infotainment - Routing and integrated services (Parking, Charge..)	Manage multi services mobility - Moments + Mobilize 360° and integrating mobility manager		- ERP global strat (Google vs BeNomad) - Avatar - Build services partnerships - RCI and mobilize services offer - Data / e PO's & community rating
	Meet additional mobility needs	Partner apps promoted from MYR	Promote mobility offers - from 5 weeks to 5 minutes. - Create product suite to value all services	Book mobility offers from 5 weeks to 5 minutes Integrate product suite within journeys		Mobilize and mobility offers
04	Help me be better	Help me be safer & more efficient - Honeymoon BCB - User Manual access in car page	- Improve my skills & efficiency - ADAS knowledge - Digital user Manual - Driving summary	Transversal & on/off coaching strategy - Alpine telemetric - Avatar MVP		- Smart and transversal engine for on & off board recommendation consistency - Car data platform - App Companion

Next steps and key success factors

- A need to setup a new governance to allow a better (Businesses + countries + DCX/IT) project's arbitration → MT+JS + BP + portfolio mngt (including Mobilize)
- Once a product has a proven value (brand, business, use) then we should take time to frame it with business before jumping to delivery (business processes are often written during the delivery) → Vision + Domains + BUs
- A need to predict the roadmap for min. one year instead of three months → Portfolio mngt + domains + IT (SAFe)
- A need for an extra budget to accelerate e-commerce platforms, omnichannel cust.journey, client account, Moments (including purchasing content), EV and mobility services within Mybrand (+21M€)
- New processes to deliver products with Morocco and Romania

RG
